

Welcome to IJCAI 2015!

We are delighted to welcome you to the Twenty-Fourth International Joint Conference on AI (IJCAI-15).

The two years since IJCAI-13 in Beijing have been a tremendously exciting time for AI. Scarcely a week has passed without news items about new advances in AI research, or exciting new applications for AI research, in areas ranging from autonomous vehicles to social media. Researchers across the globe report huge interest in AI, particularly in areas like machine learning. But of course, this excitement has been tempered by concern from well-known scientists about the potential dangers posed by AI. We look forward to discussing all these issues with you throughout IJCAI-15.

The current intense interest in AI was reflected in an extraordinary number of submissions to the conference. The technical program of the conference broke IJCAI's previous record, attracting 1,996 submissions in total. After rigorous reviewing, some 571 papers (28.6 percent) were accepted for presentation at the conference. All accepted papers are included as full-length papers in the proceedings and are invited to present as posters. Authors of all papers are invited to give oral presentations, where a distinction is made between long talks and short talks based on the papers' quality, clarity, and potential relevance to a wider audience.

Besides the main technical track, we also introduced a number of special area tracks to allow the program committee to pay particular attention in identifying highly innovative papers in these areas. These are the Machine Learning Track, Knowledge Representation Track and Computational Sustainability Track. Track chairs were encouraged to be innovative in designing their programs. A new-problem paper type is introduced in the Machine Learning Track, for example, to allow researchers who report on novel AI and Machine Learning 'problems' to have a voice. Special 'integrated solution' sessions were also reserved for papers that address problems in machine learning while being integrated with other techniques in AI.

Of course, IJCAI would not be IJCAI without an extensive workshop and tutorial program, and we are delighted to have more than 40 workshops, on topics as diverse as AI in Space to Algorithmic Game Theory, and nearly 30 tutorials, from internationally renowned researchers.

The topic of "AI and the Arts" was designated as a special theme for IJCAI-15. As such, the conference includes a special track on this theme, with technical papers reviewed in the same way as papers for the main tracks, as well as an exhibition/project demonstrations, and of course some AI and the Arts related activities throughout the week, which we hope will entertain and intrigue you. A key component of these activities is an exciting exhibition showing ongoing interactions between AI and the Arts. The exhibition will be held in the Centro Cultural Borges (close to the main conference site) from Saturday 25 July until 30 July 2015. The vernissage (with live performances) is on Sunday 26 July at 7 pm and the finissage on 30 July at 7 pm.

IJCAI-15 is the first time that the IJCAI conference has been held in South America, and we firmly believe Buenos Aires will be a fantastic venue. The city has enormous opportunities for sightseeing and other leisure activities. Take the time while you are here to enjoy a glass of justly famous Argentinian malbec wine, and to check out some of the endless shows and varied nightlife that the city has to offer. In terms of gastronomy, steak lovers are of course in for a treat, but whatever your taste, Buenos Aires will surely be able to accommodate it.

We trust you will also enjoy the social events planned for the main conference. We look forward to seeing you at the opening reception, in the Salón de Actos in the School of Law, which will be followed by a reception and unique performance by a Marching Band. The band will play tunes inspired by Latin rhythms and specifically written for the occasion – the lyrics are about the daily struggles of AI researchers. The conference banquet will be held at Señor Tango, and will include a range of typical Argentine dishes and an exclusive selection of wines, followed by a 90 minute tango show, by some of Argentina's leading exponents of the art. Tango reflects the heart and soul of Argentina, and we can think of no more fitting and enjoyable way to celebrate what we are sure will be a truly memorable IJCAI.

Guillermo Simari (Local Arrangements Chair)
Ricardo Oscar Rodríguez (Local Arrangements Chair)
Michael Wooldridge (Conference Chair)

IJCAI 2015 opening and reception

School of Law, Monday, July 27, 2015. 19:00-22:00 (Open from 18:30hs. on; opening ceremony starts at 19:00h)

Address: Av. Figueroa Alcorta 2263 (http://www.uba.ar/recorridos/derecho/derecho_fachada.html)

Free for IJCAI-15 attendees

The IJCAI-15 Opening Ceremony will begin at 19:00 hours on Salón de Actos in the School of Law and will be followed by a reception and unique performance by a Marching Band. Michael Wooldridge, IJCAI-15 Conference Chair, will chair the Opening Ceremony. During the ceremony, the following awards will be given: IJCAI-15 Donald E. Walker Distinguished Service Award, the IJCAI-15 Research Excellence Award, and the IJCAI/JAIR award. In addition, the following awards will be announced: the IJCAI-15 Computers and Thought Award, and the IJCAI-15 John McCarthy Award.

The first part of the ceremony will be brought to a close with a performance-based on AI music. Next, the Opening Ceremony will be turned into a Fiesta thanks to an appearance of the IJCAI-2015 Praise Marching Band. The band will play tunes inspired by Latin rhythms and specifically written for the occasion. The lyrics are about the daily struggles of AI researchers. Attendees will enjoy a lunch and taste typical Argentine wines.

The conference badge gives access to the Opening Ceremony. **DON'T FORGET YOUR BADGE!**

We will provide transportation from the Sheraton and W&T Venue. This shuttle bus service will start operating between 18:00 and 18:45. Attendees will return to the Sheraton by themselves.

IJCAI 2015 conference banquet

It will take place on Wednesday, July 29, 2015 at 20:30, at Señor Tango.

Free for IJCAI-15 attendees

We will provide return transportation to the venue shuttle buses from the Sheraton will start operating at 19:30.

Dinner will include typical Argentine dishes and an exclusive selection of wines.

After dessert, you will enjoy a one and a half hour tango show with a live orchestra, dancing, and professional singers. You will be witness to the evolution of the "Tango" through history (milonga, arrabalero and modern tango) with beautiful scenery and an incredible atmosphere. The show entertains all five senses: it is a lavish display of light,

colour, and sound with state-of-the-art technology to enhance the most dazzling show in the history of tango. It was created, directed and produced by Fernando Soler; it boasts over forty artists on stage, and throughout the two-hour show, it goes from traditional tango - played by the orchestra of Maestro Ernesto Franco, who was Juan Darienzo's first bandoneon for 24 years, during the golden years - to the most contemporary Tango of the late Maestro Astor Piazzolla, played by the "Juventango" orchestra. The show includes performer twins Marcela and Fernanda Pereyra; and Sangre Andina, musical amusement in the hands of Coquena Lamas and his group, and has nine dancing couples who create individual and group choreographies, boasting impressive skills and impersonating renowned personalities tangoing to the appropriate music in their typical attire. Among them, "Escondite", a rendering of "Apache" tango, a European flamenco-inspired ballroom tango; and "Roxanne", the very first choreography to connect Tango with Hollywood, created and musicalized by Mariano Mores combining lyrics by Sting. The show ends with the performance of "Don't cry for Me Argentina", a second-nature anthem for our country. All artists on stage participate and their roles bear witness to our true national identity, and our deep love for the light blue-and-white national colors.

Dinner and Tango Show are included in the registration fee. You will need your banquet ticket to board the bus. Please don't forget your banquet ticket!

Student only reception

IJCAI-15 will hold a Student Reception on Thursday, July 30, 20:00-24:00 in TAZZ SOHO (Armenia 1744), an Excellent Entertainment Bar located a few meters away from the famous Plaza Armenia in Palermo Soho. This 3-level restaurant offers a variety of options to have fun. From comfortable sofas, private meeting rooms and 8 pool tables to a great dance-floor on the roof with the best music! Although all its bars are top quality, the best one is on the ground floor. It offers special menus for birthdays, meetings or events, ranging from pizza, Mexican food to more sophisticated and expensive cuisine.

We hope the reception may be an ideal venue for student to network with fellows students from all around the world, exchange experience, learn about research opportunities and enjoy a great moment strengthen the social links of their generation.

You will need your Student Reception ticket to enter to Tazz. Please don't forget your Student Reception ticket!

Exhibition

The Exhibits will be located in the San Telmo Room at 1st floor of Sheraton Convention Center.

Exhibit hours:

Wednesday, July 29: 10:00 - 17:00

Thursday, July 30: 10:00 - 17:00

Friday, July 31: 10:00 - 15:00

The IJCAI 2015 Exhibits Programme will provide companies and academic institutions an excellent way to reach the leading scientists and practitioners in artificial intelligence. Whether you want to showcase your intelligent technology services to the AI community, to make visible your position in the field, or provide conference participants with examples of the current uses, needs and opportunities for Artificial Intelligence, IJCAI-15 is the premier venue to accomplish these goals. The exhibition area will be co-located at coffee break area. Exhibitors with available booths are: Alibaba, Adobe, Baidu, bigML, Co-Invent, Essence, Facebook, Huawei, IBM, Insight, Medallia, Microsoft, Praise, Tencent, Yahoo, Elsevier, Springer, and IJCAI-17.

6. Alexander Berman and Valencia James (Sweden):

Kinetic dialogues

7. Leo Nuñez (Argentina):

Game of life

The exhibition will be held in the Centro Cultural Borges (close to the main conference site) from Saturday 25 July until 30 July 2015. The vernissage (with live performances) is on Sunday 26 July at 7 pm and the finissage on 30 July at 7 pm.

ARTE@IJCAI Exhibition

Centro Cultural Borges

Viamonte 525

Mon– Sat 10 a 21hs

Sun 12 a 21hs.

The theme of IJCAI 2015 is AI and the Arts, and this is realized through an invited talk, a music performance based on AI at the opening, a special track of accepted papers and demos, and an exhibition at the Borges Cultural Centre, one of the most renowned art centers of Buenos Aires. The exhibition is intended to show to the people of Buenos Aires as well as conference attendees the exciting interactions that have been taking place between AI and the Arts.

The artists contributing to this exhibition are:

1. Jon McCormack (Australia):

The Unknowable

2. Patrick Tresset (France):

5 robots named Paul

3. Karl Sims (USA):

Dual bodies

4. Olafur Eliasson (Germany):

Look into the box

5. Annemarie Maes (Belgium):

The scaffolded sound beehive

IJCAI 2015 Awards

The IJCAI Organization is proud to announce the IJCAI-15 Awards!

The IJCAI-15 Award for Research Excellence, the IJCAI John McCarthy Award, and the Computers and Thought Award are awarded by the IJCAI Board of Trustees, upon recommendation by the IJCAI-15 Awards Selection Committee, which consists of:

- Tom Dietterich, Oregon State University (USA)
- Craig Knoblock, University of Southern California, ISI (USA) (Chair)
- Hector Levesque, University of Toronto (CANADA)
- Peter Stone, University of Texas at Austin (USA), and
- Sebastian Thrun, Udacity, Google and Stanford University (USA).

The IJCAI Awards Selection Committee receives advice from members of the IJCAI-15 Awards Review Committee, who comment on the accuracy of the nomination material and provide additional information about the nominees. The IJCAI-15 Awards Review Committee is the union of the former Conference Chairs of IJCAI, the IJCAI-15 Advisory Committee, the Program Chairs of the last three IJCAI conferences, and the past recipients of the IJCAI Award for Research Excellence and the IJCAI Distinguished Service Award, with nominees excluded.

IJCAI-15 AWARD FOR RESEARCH EXCELLENCE

The Research Excellence award is given to a scientist who has carried out a program of research of consistently high quality throughout an entire career yielding several substantial results. Past recipients of this honor are the most illustrious group of scientists from the field of Artificial Intelligence.

They are: John McCarthy (1985), Allen Newell (1989), Marvin Minsky (1991), Raymond Reiter (1993), Herbert Simon (1995), Aravind Joshi (1997), Judea Pearl (1999), Donald Michie (2001), Nils Nilsson (2003), Geoffrey E. Hinton (2005), Alan Bundy (2007), Victor Lesser (2009), Robert Anthony Kowalski (2011), and Hector Levesque (2013).

The winner of the 2015 Award for Research Excellence is **Barbara Grosz**, Higgins Professor of Natural Sciences at the School of Engineering and Natural Sciences, Harvard University. Professor Grosz is recognized for her pioneering research in Natural Language Processing and in theories and applications of Multiagent Collaboration.

IJCAI-15 COMPUTERS AND THOUGHT AWARD

The Computers and Thought Award is presented at IJCAI conferences to outstanding young scientists in artificial intelligence. The award was established with royalties received from the book, *Computers and Thought*, edited by Edward Feigenbaum and Julian Feldman. It is currently supported by income from IJCAI funds. Past recipients of this honor have been: Terry Winograd (1971), Patrick Winston (1973), Chuck Rieger (1975), Douglas Lenat (1977), David Marr (1979), Gerald Sussman (1981), Tom Mitchell (1983), Hector Levesque (1985), Johan de Kleer (1987), Henry Kautz (1989), Rodney Brooks (1991), Martha Pollack (1991), Hiroaki Kitano (1993), Sarit Kraus (1995), Stuart Russell (1995), Leslie Kaelbling (1997), Nicholas Jennings (1999), Daphne Koller (2001), Tuomas Sandholm (2003), Peter Stone (2007), Carlos Guestrin (2009), Andrew Ng (2009), Vincent Conitzer (2011), Malte Helmert (2011), and Kristen Grauman (2013).

The winner of the 2015 IJCAI Computers and Thought Award is **Ariel Procaccia**, Assistant Professor at the Computer Science Department, Carnegie Mellon University. Professor Procaccia is recognized for his contributions to the fields of computational social choice and computational economics, and for efforts to make advanced fair division techniques more widely accessible.

IJCAI-15 JOHN MCCARTHY AWARD

The Trustees of the International Joint Conferences on Artificial Intelligence (IJCAI) are pleased to announce the John McCarthy research award. This award is intended to recognize established mid-career researchers that have built up a major track record of research excellence in artificial intelligence. Recipients of the award will have made significant contributions to the research agenda in their area and will have a first-rate profile of influential research results.

The award is named for John McCarthy (1927-2011), who is widely recognized as one of the founders of the field of artificial intelligence. As well as giving the discipline its name, McCarthy made fundamental contributions of lasting importance to computer science in general and artificial intelligence in particular, including time-sharing operating systems, the LISP programming languages, knowledge representation, common-sense reasoning, and the logicist paradigm in artificial intelligence.

The award was established with the full support and encouragement of the McCarthy family.

The winner of the 2015 inaugural John McCarthy Award is **Bart Selman**, Professor at the Department of Computer Science, Cornell University. Professor Selman is recognized for expanding our understanding of problem complexity and developing new algorithms for efficient inference.

DONALD E. WALKER DISTINGUISHED SERVICE AWARD

The IJCAI Distinguished Service Award was established in 1979 by the IJCAI Trustees to honor senior scientists in AI for contributions and service to the field during their careers. Previous recipients have been: Bernard Meltzer (1979), Arthur Samuel (1983), Donald Walker (1989), Woodrow Bledsoe (1991), Daniel G. Bobrow (1993), Wolfgang Bibel (1999), Barbara Grosz (2001), Alan Bundy (2003), Raj Reddy (2005), Ronald J. Brachman (2007), Luigia Carlucci Aiello (2009), Raymond C. Perrault (2011), and Wolfgang Wahlster (2013).

At IJCAI-15, the Donald E. Walker Distinguished Service Award will be given to **Anthony G. Cohn**, Professor of Automated Reasoning at the University of Leeds. As a pioneering researcher in Knowledge Representation and Reasoning, Professor Cohn is recognized for his substantial contributions, as well as his outstanding service to the international, European and UK AI communities, including terms as President of IJCAI, ECCAI, KR Inc., and AISB, and as Editor-in-chief of the AI journal, where he made significant contributions to the success of the journal and to the wider dissemination of AI into the scientific community.

IJCAI-JAIR Best paper prize

Tuesday, July 28th
10:20-10:40 in Room LB2

The 2015 IJCAI-JAIR Best Paper Prize is awarded to an outstanding paper published in JAIR in the preceding five calendar years. Funding for this award is provided by the IJCAI organisation.

The LAMA Planner: Guiding Cost-Based Anytime Planning with Landmarks Silvia Richter and Matthias Westphal JAIR volume 39, pages 127-177

This paper gives a comprehensive description and analysis of the award winning LAMA planner. LAMA's use of landmarks in combination with cost-sensitive heuristics is presented, and the performance of the planner in different configurations is evaluated and analyzed in a detailed and insightful experimental study. This excellently written paper has been very influential and has helped to establish the use of landmarks as a key technique in classical planning.

ECCAI Thesis Award

Tuesday, July 28th
11:10-12:10 in Room C

The 2014 ARTIFICIAL INTELLIGENCE DISSERTATION AWARD sponsored by ECCAI, the European Coordinating Committee for Artificial Intelligence goes to Dr Benjamin Kaufmann, from the University of Potsdam, for his thesis "High Performance Answer Set Solving". This Award includes a certificate signed by the ECCAI Chair and 1.500 Euros.

AI Journal Awards

AI Journal Classic Paper Award:
"Fusion, propagation, and structuring in belief networks" by Judea Pearl

AI Journal Prominent Paper Award:
"Label ranking by learning pairwise preferences" by Eyke Hüllermeier, Johannes Fürnkranz, Weiwei Cheng and Klaus Brinker

Invited speakers

USING CONSTRAINT-BASED SEARCH TO SCHEDULE SCIENCE CAMPAIGNS FOR THE ROSETTA ORBITER

Dr. Steve Chien

The Jet Propulsion Laboratory,
California Institute of Technology

Friday, July 31

14:00-15:00

Libertador Plenary Room: LB

CONSCIOUSNESS IN BIOLOGICAL AND ARTIFICIAL BRAINS

Christof Koch

Allen Institute for Brain Science in
Seattle

Tuesday, July 28

14:00-15:00

Retiro Plenary Room: R

MAKING INTELLIGENT MOBILE SERVICE ROBOTS A REALITY

Manuela M. Veloso

Computer Science Department at
Carnegie Mellon University

Thursday, July 30

14:00-15:00

Libertador Plenary Room: LB

TOWARDS GENERAL ARTIFICIAL INTELLIGENCE

Dr. Julien Cornebise

Google DeepMind, Towards Gen-
eral Artificial Intelligence

Tuesday, July 28

14:00-15:00

Retiro Plenary Room: R

PROGRAMMING AGENTS VIA REWARDS

Michael L. Littman

Computer Science at Brown
University

Friday, July 31

14:00-15:00

Libertador Plenary Room: LB

AI AND ROBOTICS: TALES FROM KIVA SYSTEMS

Pete Wurman

Kiva Systems, the Boston-based
company

Wednesday, July 29

14:00-15:00

Retiro Plenary Room: R

IN KNOWLEDGE WE TRUST

Dr. Evgeniy Gaborilovich

Google

Wednesday, July 29

14:00-15:00

Libertador Plenary Room: LB

ART IS A SYSTEM

Jon McCormack

Faculty of Information technology
at Monash University in Melbourne

Thursday, July 30

14:00-15:00

Retiro Plenary Room: R

Special events

IJCAI-15 Panel: who speaks for AI?

Wednesday
July 29th
15:10-16:30
Room Catalinas

Panelists:

- Maria Gini (Minnesota)
- Barbara Grosz (Harvard)
- Francesca Rossi (Padua)
- Stuart Russell (Berkeley)
- Manuela Veloso (CMU)

Chair:

- Michael Wooldridge (Oxford)

These are boom times for AI. Articles celebrating the success of AI research appear frequently in the international press. Millions of people every day routinely use AI-based systems that the founders of our field would hail as miraculous. And there is a palpable sense of excitement about impending applications of AI technologies. But while all this is cause for celebration, it could be argued that the discipline of AI is fragmented and largely uncoordinated – and that the entire AI community suffers as consequence.

We have a bewildering array of different organisations at national and international level representing us (AAAI, IJCAI, ECCAI, PRICAI, KR, ...), and a byzantine collection of specialised conferences and journals, with very little coordination or communication between them. The results are obvious. Researchers in distinct sub-fields often work in silos, unaware of work that is going on in other sub-fields of AI, and the development of the field is hindered by endless fragmentation.

Moreover, in the public arena, the lack of any authoritative voice for AI creates a vacuum, where ill-informed speculation about the potential of AI is rife, and attention-seeking claims in the popular press receive unwarranted attention, with nobody in a position to speak for the field, and give an authoritative, informed, and balanced response. In this panel, we want to discuss these issues, and how best we, as AI researchers, can address them.

The panelists are invited to present their views on this subject, and to constructively discuss how we, as the AI research community, can best move forward.

To motivate the discussion, some questions for the panel are as follows:

– Is it possible to de-fragment the AI community? For example, could NIPS and IJCAI ever be seen as companion events, or is the nature of our field such that fragmentation is inevitable?

– What kind of professional organisation would work best for the field of AI? (Member organisation a la AAAI, ACM, or other...?)

– What public activities should an AI professional association undertake (beyond the scientific mission of organising conferences etc)? Press releases on AI? Responding to ill-informed pronouncements about AI?

– What role should we as individual AI researchers, and our AI associations play in informing public opinion, for example about the future benefits or potential existential risks that AI presents?

IJCAI15 Academic Speed Dating

Monday,
July 27

17:00-18:30 (just before to go to the conference reception)
Salón de Actos. Ground floor at New Building of Facultad de Ciencias Económicas

Meet IJCAI attendees from senior researchers to student newcomers! It surely will be a great opportunity to network, and to receive or give mentoring and career advice. Doors open at 5:00 PM sharp. There will be no admittance after 5:10 PM, and admittance is on a first-come basis. One lucky participant will win a free Nexus 7 in the door raffle.

IJCAI15 Games night

Tuesday
July 28

19:30- 21:30
Sheraton, Room Golden Horn

Come to spend an evening playing games with other IJCAI participants at the new proposal of IJCAI Games Night. There will be AI-themed games organized with prizes to be won for the lucky. Bring your own games to play afterward.

AI Non-technical Talks Track

Tuesday to Friday

July 28–31

14:00-15:00

Room C Tuesday and Wednesday, Room GH Thursday and Friday

– Tuesday

“The Economic Implications of Machine Intelligence: Lessons from the Second Machine Age”, Erik Brynjolfsson (remotely). We should be optimistic about the future because technological progress, ‘the only free lunch that economists believe in,’ is accelerating quickly past our intuitions and expectations. But we should also be mindful of our values and our choices: as technology races ahead, it may leave a lot of people, organizations and institutions behind.

– Wednesday

“Killer robots, the end of humanity, and all that: What should a good AI researcher do?” Stuart Russell. Hear an update on the campaign to ban lethal autonomous weapons, as well as the fears that AI poses an existential threat to mankind.

– Thursday

“100 year AI project”, Barbara Grosz, Chair of the AI100 Standing Committee. The One Hundred Year Study on Artificial Intelligence, or AI100, is a 100-year effort to study and anticipate how the effects of artificial intelligence will ripple through every aspect of how people work, live and play.

– Friday

“Panel on Countering Discrimination”. This interactive panel will explore how different communities within AI face discrimination and how we might counter this. Please come, share and learn.

Press conference

Every day

8:00-8:30

Ombú 2nd floor

IJCAI Fellow / Student Lunches

Tuesday to Friday

July 28–31

Lunch time.

For the first time in an IJCAI, we are providing an opportunity for students to chat with an AAAI or ECCAI Fellow over an informal lunch during the conference. Students should meet their designated Fellow at the onsite registration desk on their assigned day.

Woman’s breakfast

Tuesday

July 27

8:00-8:30

A networking breakfast will be offered on a place TBA for an informal discussion on issues facing women in AI and CS, with particular emphasis in possible solutions, tying up with themes discussed in the workshop Women in IA and CS.

Panel: Rethinking Turing Test

Friday, July 31, 10:40-12:10

Room R1

The Turing test was considered a grand goal to be achieved by generations of Artificial Intelligence researchers. It has helped inspire many new ideas and has also been the subject of many debates. Now over 60 years old, we wish to take a fresh look at the test given the current surge of interest and achievement in artificial intelligence, examining its origin and projecting beyond the horizon. The panel consists of researchers with different perspectives on what artificial intelligence has achieved so far and what more needs to be done. In particular, the debate will be centered on whether the Turing test will continue to serve as the signpost for developing intelligent machines, or perhaps other candidates are emerging to serve that purpose.

General tutorial/workshop timetable

| Tutorials and Workshops timetable | |
|-----------------------------------|--------------------|
| 8:00-8:45 | Registration |
| 8:45-10:30 | Morning sessions |
| 10:30-11:00 | Coffee break |
| 11:00-12:45 | Morning sessions |
| 12:45-13:45 | Lunch* |
| 13:45-15:30 | Afternoon sessions |
| 15:30-16:00 | Coffee break |
| 16:00-17:45 | Afternoon sessions |

* There are many nice and affordable restaurants near the venue. Please, consult the recommendations included in the IJCAI2015 package.

Tutorial program

| TRACK 1: AGENTS AND DECISION MAKING | | |
|-------------------------------------|---------------------------------------------|--------------------------------------------------------------------------------------------------|
| | Title | Tutors |
| T-5 (HD) | Automated composition and agent programming | Giuseppe De Giacomo, Fabio Patrizi and Sebastian Sardina |
| T-6 (HD) | Multi-agent programming | Olivier Boissier, Rafael H. Bordini, Jomi Fred Hübner, Alessandro Ricci, and Jaime Simao Sichman |
| T-12 (HD) | Crowd computing | Mark Klein and Ana Cristina B. Garcia |
| T-19 (FD) | Diffusion in social networks | Paulo Shakarian |
| T-15 (HD) | Multi-objective decision making | Shimon Whiteson and Diederik M. Roijers |

| TRACK 2: KNOWLEDGE REPRESENTATION AND REASONING | | |
|-------------------------------------------------|------------------------------|-------------------------------------------------------------------|
| | Title | Tutors |
| T-2 (FD) | Argumentation | Federico Cerutti |
| T-3 (HD) | Logic Programming | Sergio Greco and Cristian Molinaro |
| T-7 (HD) | Temporal Logic | Jose Aguilar |
| T-10 (HD) | Constraint logic programming | Roman Bartak |
| T-18 (FD) | Answer set programming | Martin Gebser, Roland Kaminski, Javier Romero, and Torsten Schaub |
| T-24 (HD) | Tweety system | Matthias Thimm |
| T-26 (FD) | Logic-based Merging | Ramon Pino Pérez |

| TRACK 3: REASONING UNDER UNCERTAINTY | | |
|--------------------------------------|------------------------------------------------|------------------------------------------------------------|
| | Title | Tutors |
| T-8 (HD) | Combinatorial optimization in graphical models | Rina Dechter, Radu Marinescu, Alexander Ihler, Lars Otten |
| T-4 (HD) | Probabilistic programming | Luc De Raedt and Angelika Kimmig |
| T-22 (HD) | Sensitivity Analysis in Graphical Models | Cassio de Campos, Alessandro Antonucci, and Giorgio Corani |

| TRACK 4: SEMANTIC WEB AND KNOWLEDGE ENGINEERING | | |
|-------------------------------------------------|------------------------------------------------------------|---------------------------------------------|
| | Title | Tutors |
| T-11 (HD) | Foundations of Web Personalization and Recommender Systems | Jill Freyne and Shlomo Berkovsky |
| T-20 (HD) | Internet of things | Munindar P. Singh and Amit K. Chopra |
| T-23 (HD) | Formal Concept Analysis | Sergei O. Kuznetsov and Amedeo Napoli |
| T-28 (HD) | Collaborative Knowledge | Nada Matta, Jason DAI and Francois Rauscher |

| TRACK 5: NATURAL LANGUAGE PROCESSING | | |
|--------------------------------------|-----------------------------------------------------------|--------------------------------|
| | Title | Tutors |
| T-14 (HD) | Evolutionary semantics for language grounding in robotics | Luc Steels |
| T-17 (HD) | Natural language understanding | Nicolae Duta |
| T-25 (HD) | Visual Text Analytics | Evangelos Milios and Axel Soto |

| TRACK 6: MACHINE LEARNING | | |
|---------------------------|---------------------------------------------------------------|----------------------------------------------------|
| | Title | Tutors |
| T-9 (HD) | Lifelong machine learning | Zhiyuan Chen and Bing Liu |
| T-27 (HD) | Weakly Supervised Classification Problems | Jose A. Lozano, I. Inza, and J. Hernandez-Gonzalez |
| T-29 (FD) | System, algorithm, and theory foundations of scalable machine | Eric P. Xing and Qirong Ho |

| TRACK 7: AI APPLICATIONS | | |
|--------------------------|----------------------|-------------------------------------------------|
| | Title | Tutors |
| T-1 (HD) | Smart cities | Biplav Srivastava |
| T-16 (FD) | Musical metacreation | Philippe Pasquier, Arne Eigenfeldt, Oliver Bown |
| T-21 (HD) | Context awareness | Juan Carlos Augusto |

Workshop program

| | Title | Date | Room |
|------------------|-------------------------------------------------------------------------------------------------------------------|---------------------------------|------|
| W1 + W37 | Joint Workshop on Preferences and Personalization | Full day, July 27 | 440 |
| W2 | The Fourth IJCAI International Workshop on Graph Structures for Knowledge Representation and Reasoning (GKR 2015) | Full day, July 25 | 440 |
| W3 | Behavioral, Economic and Computational Intelligence for Security | Full day, July 25 | 442 |
| W4 | Third International Workshop on Theory and Applications of Formal Argumentation (TAFA-15) | One and a half days, July 25-26 | 445 |
| W5 | Computer Games Workshop at IJCAI 2015 | Full day, July 26 | 442 |
| W6 | Workshop at IJCAI 2015 "What can FCA do for Artificial Intelligence?" | Full day, July 25 | 443 |
| W7 | AI in Space | One and a half days, July 25-26 | 446 |
| W8 | International Workshop on Planning and Scheduling for Space (IW PSS) | One and a half days, July 26-27 | 446 |
| W9 | Workshop on Synergies between Multiagent Systems, Machine Learning, and Complex Systems | Full day, July 27 | 442 |
| W10 | 2nd International Workshop on Smart Simulation and Modelling for Complex Systems (SSMCS2015) | Full day, July 25 | 452 |
| W11 | Advances in Bioinformatics and Artificial Intelligence : Bridging the Gap | Full day, July 27 | 443 |
| W12 | General Intelligence in Game-Playing Agents | Full day, July 27 | 458 |
| W13 | Ontologies and logic programming for query answering | Full day, July 25 | 448 |
| W14 | Proposal of Chance Discovery, Data Synthesis, Curation and Data Market | Full day, July 26 | 440 |
| W15 + W40 | Replicability and Reproducibility in Natural Language Processing: adaptive methods, resources and software. | Full day, July 26 | 448 |
| W16 | Second International Workshop on Defeasible and Ampliative Reasoning (DARE) | Full day, July 27 | 457 |
| W17 | Hybrid Reasoning | Full day, July 26 | 443 |
| W19 | 10th International Workshop on Artificial Intelligence Techniques for Ambient Intelligence (AITAmI'15) | Afternoon, July 26 | 452 |
| W20 + W36 | Coordination, Organizations, Institutions and Norms in Agent Systems (COIN@IJCAI 2015) | Full day, July 26 | 450 |
| W22 | 10th International Workshop on Neural-Symbolic Learning and Reasoning (NeSy'15) | Full day, July 27 | 456 |
| W23 + W26 | Modular Ontologies, Belief Change and Non Monotonic Reasoning in Ontologies and Databases. | Full day, July 26 | 453 |
| W24 | IJCAI-15 workshop on innovative applications of game theory and market design | Full day, July 26 | 455 |
| W25 | WL4AI'15: Weighted Logics for Artificial Intelligence | Full day, July 27 | 453 |
| W28 + W35 | Cognitive Knowledge Acquisition, Cognitive Computing and Applications for Augmented Human Intelligence | Full day, July 25 | 450 |
| W29 | Workshop on Social Influence Analysis (SocInf'2015) | Full day, July 27 | 455 |
| W30 | Women in AI and CS | Morning, July 26 | 452 |
| W31 | Formal Ontologies for Artificial Intelligence (FOFAI) | Full day, July 27 | 452 |
| W34 | Fuzzy Logic in AI | Full day, July 25 | 453 |
| W38 | Artificial Intelligence for Knowledge Management | Full day, July 27 | 450 |
| W39 | Spatio-Temporal Dynamics | Full day, July 26 | 456 |
| W41 | IJCAI-15 Workshop on Algorithmic Game Theory | Full day, July 27 | 445 |
| W42 | AI and Feedback | Morning, July 26 | 457 |
| W43 | 3rd Workshop on Heterogeneous Information Network Analysis (HINA) | Full day, July 25 | 455 |
| DC | Doctoral Consortium | Full day, July 27 | 448 |

Sessions and posters

The IJCAI technical program consists of both oral presentations by accepted authors and poster presentations during the half day of the presentations. The posters of each author are required to put up their posters before each half day starts. They will also be present to discuss their posters at breaks with the audience. We hope both the oral presentations and the posters will give the attendees a full picture of the scientific advances of AI.

Doctoral Consortium

July 27, 2015

08:45

Room 448 (New Building – Facultad de Ciencias Económicas)

The doctoral consortium at IJCAI provides an opportunity for Ph.D. students to discuss their research interests and career objectives with established researchers in AI, network with other participants, and receive mentoring about career planning and career options. The doctoral consortium will expose students to different areas of research within AI and help building professional connections within the international community of AI researchers. Below there is a tentative schedule for activities.

| Timetable | Activity |
|---------------|--------------------------------|
| 7:30 – 8:45 | Registration |
| 8:45 – 9:00 | Introduction |
| 9:00 – 10:00 | Invited Talk |
| 10:00 – 10:30 | Poster advertisements |
| 10:30 – 11:00 | Coffee Break |
| 11:00 – 11:45 | Posters |
| 11:45 – 12:45 | Career Panel |
| 12:45 – 14:00 | Lunch |
| 14:00 – 15:30 | Invited Talk: Gabriela Llaneza |
| 15:00 – 15:30 | Poster advertisements |
| 15:30 – 16:00 | Coffee Break |
| 16:00 – 17:00 | Posters |
| 17:00 – 17:45 | Wrapping Up |

IJCAI 2015 Distinguished Papers

July 28, 2015

9:40-10:40

Room GH

IJCAI-2015 Distinguished Paper Award

- Recursive Decomposition for Nonconvex Optimization
Abram L. Friesen and Pedro Domingos
(Main Track #75)

- Bayesian Active Learning for Posterior Estimation
Kirthivasan Kandasamy, Jeff Schneider, Barnabas Poczos
(ML Track #112)

IJCAI-2015 Honorable Mention

- Reasonable Highly Expressive Query Languages
Pierre Bourhis, Markus Krötzsch, and Sebastian Rudolph
(KR Track#297)

Repeat Buyers Prediction Competition

IJCAI is pleased to announce a large-scale machine learning competition, hosted by Alibaba Group, a gold sponsor. This competition aims to promote applications of advanced techniques from AI research to real-world problems. Contestants will have access to vast amount of data provided by Tmall.com, the largest B2C platform in China. Top three winners will be invited to present their results at an IJCAI workshop and get a chance to test their algorithms online.

In April 2015, participants all over the world was invited to play with real transaction data from Tmall.com. The goal was to apply advanced and sophisticated machine learning and data mining techniques to predict which shoppers would become repeat buyers after sales promotion. The top 3 teams may present their solutions at the IJCAI workshop “*Social Influence Analysis*” (Afternoon of Monday July 27, Room 455). In addition, there are a lot of prizes.

AI Video Competition

IJCAI 2015 is pleased to continue the AI Video Competition that was an integral part of the IJCAI technical programs from IJCAI-89 until IJCAI-97 and reinstated in 2011. A total of 14 submissions were accepted and will be screened in common areas during the conference. Additionally, a number of awards will be given to the best videos in several categories. Thus, awards will be given to the best long video, best short video, best application video, most entertaining video, most educational video, most societally beneficial video, and best robotics video.

The accepted videos are:

The Kognit Storyboard: Cognitive Models and Mixed Reality for Dementia Patients

Daniel Sonntag (DFKI); Marina Böllig (HBK); Martha Bayer (HBK); Muriel Serf (HBK).

Practice and Performance Analysis Inspiring Social Education

Josep Lluís Arcos (IIIA-CSIC); Harry Brenton (Goldsmiths University of London); Ismel Brito Rodriguez (IIIA-CSIC); Anna Enciso (IIIA-CSIC); Marco Gillies (Goldsmiths University of London); Patricia Gutierrez (IIIA-CSIC); Mark d’Inverno (Goldsmiths University of London); Dave de Jonge (IIIA-CSIC); Maria Krivenski (Goldsmiths University of London); Lissette Lemus (IIIA-CSIC); Johan Loeckx (VUB); Ramon Lopez de Mantaras (IIIA-CSIC); Daniel Martin Martinez (Sony CLS); Nardine Osman (IIIA-CSIC); François Pachet (Sony CLS); Mathieu Ramona (Sony CLS); Bruno Rosell (IIIA-CSIC); Tatiana Schofield (Goldsmiths University of London); Joan Serra (IIIA-CSIC); Carles Sierra (IIIA-CSIC); Luc Steels (VUB); Matthew Yee-King (Goldsmiths University of London).

Deep Neural Networks are Easily Fooled: High Confidence Predictions for Unrecognizable Images

Anh Nguyen (University of Wyoming); Jason Yosinski (Cornell University); Jeff Clune (University of Wyoming).

Neural modularity helps organisms evolve to learn new skills without forgetting old skills

Kai Olav Ellefsen (University of Science and Technology, Trondheim); Jean-Baptiste Mouret (Sorbonne Université UPMC Univ Paris VI); Jeff Clune (University of Wyoming).

Unshackling Evolution: Evolving Soft Robots with Multiple Materials and a Generative Encoding

Nick Cheney (Cornell University); Robert MacCurdy (Cornell University); Jeff Clune (University of Wyoming); Hod Lipson (Cornell University).

ObViz: Opinion-balanced News Delivery

Claudiu Musat (EPFL); Maxime Darcot (EPFL); Boi Faltings (EPFL); Audrey Loeffel (EPFL); Gaylor Bosson (EPFL); Alexandru Ardelean (EPFL); Marina Boia (EPFL).

Learning of Human Motion Feedback with Neural Self-Organization

Florian von Stosch (University of Hamburg); German Parisi (University of Hamburg); Sven Magg (University of Hamburg); Stefan Wermter (University of Hamburg).

Intelligent Agent Supporting Human-Multi-Robot Team Collaboration

Ariel Rosenfeld (Bar-Ilan University); Oleg Maksimov (Bar-Ilan University); Sarit Kraus (Bar-Ilan University).

Humanoidly Speaking – Learning about the world and language with a humanoid friendly robot

Xavier Hinaut (University of Hamburg); Johannes Twiefel (University of Hamburg); Marcelo Borghetti Soares (University of Hamburg); Pablo Barros (University of Hamburg); Luiza Mici (University of Hamburg); Stefan Wermter (University of Hamburg).

Can you play that? A humanoid robot actively learning how to play an unknown musical instrument

Arturo Ribes Sanz (IIIA-CSIC); Jesus Cerquides (IIIA-CSIC); Ramon Lopez de Mantaras (IIIA-CSIC); Yiannis Demiris (Imperial College London).

Goal Oriented Teachable Agent in Virtual Learning Environment

Ailiya Borjigin (Nanyang Technological University); Chunyan Miao (Nanyang Technological University); Zhiqi Shen (Nanyang Technological University); Han Yu (Nanyang Technological University); Su Fang Lim (Nanyang Technological University); Toh Hsiang Benny Tan (Nanyang Technological University); Zeng Zhiwei (Nanyang Technological University); Yuxi Guo (Nanyang Technological University); Simon Fauvel (Nanyang Technological University); Yang Qiu (Nanyang Technological University); Kah Hoe Pang (Nanyang Technological University); Jun Ji (Nanyang Technological University).

Smooth Handling of Human Interrupts in Team Oriented Plans

Nathan Brooks (Carnegie Mellon); Paul Scerri (Platypus); Alessandro Farinelli (University of Verona); Nicolo’ Marchi (University of Verona); Masoume Raeissi (University of Verona).

Autonomous Multi-Vehicle Coordination

James Guo Ming Fu (Singapore-MIT Alliance for Research and Technology); Xiaotong Shen (Nanyang Technological University); Hans Andersen (Nanyang Technological University); Wei Liu (Nanyang Technological University); Scott Pendleton (Nanyang Technological University); Baoxing Qin (Singapore-MIT Alliance for Research and Technology); Zhuang Jie Chong (Singapore-MIT Alliance for Research and Technology); Cody Kamin (Singapore-MIT Alliance for Research and Technology); Mark Adam Ang (Singapore-MIT Alliance for Research and Technology); Tawit Uthaicharoenpong (Singapore-MIT Alliance for Research and Technology); Zhiyong Weng (Singapore-MIT Alliance for Research and Technology); Mengdan Feng (Nanyang Technological University); Marcelo Ang (Nanyang Technological University); Daniela Rus (MIT); Emilio Frazzoli (MIT).

Multi-vehicle Motion Coordination Using V2V Communication

Xiaotong Shen (Nanyang Technological University); James Guo Ming Fu (Singapore-MIT Alliance for Research and Technology); Scott Pendleton (Nanyang Technological University); Wei Liu (Nanyang Technological University); Hans Andersen (Nanyang Technological University); Zhuang Jie Chong (Singapore-MIT Alliance for Research and Technology); Baoxing Qin (Singapore-MIT Alliance for Research and Technology); Cody Kamin (MIT); Mark Adam Ang (Singapore-MIT Alliance for Research and Technology); Tawit Uthaicharoenpong (Singapore-MIT Alliance for Research and Technology); Zhiyong Weng (Singapore-MIT Alliance for Research and Technology); Mengdan Feng (Nanyang Technological University); Marcelo Ang (Nanyang Technological University); Daniela Rus (MIT); Emilio Frazzoli (MIT).

Angry birds AI competition

Room Ombú 2nd Floor. Sheraton Convention Center
 July 29-30, 2015. 9:00-18:00
 Near Registration Desk Sheraton Convention Center
 July 31, 2015. 10:00-18:00

The goal of the Angry Birds AI Competition is to build AI agents that can play the popular game “Angry Birds” as good as the best human players. In qualification rounds on July 29, the agents who qualify for the final rounds on July 30 will be determined. The highlight will be the Grand Final of the best AI agents at 18:00 on July 30. During the competition, there will also be a number of paper presentations. Further details and a complete schedule can be found at <http://aibirds.org>.

This year for the first time there will be a new competitive track where agents play the same levels with alternating shots. The agent scoring the winning shot gets all the points, but agents can bid points for the right of first or second shot.

In the Angry Birds’ Man vs Machine Challenge on July 31, IJCAI participants and the general public have the chance to challenge the winning AI agents to see if humans are still better at playing Angry Birds than AI. Human players can compete from 10:00 onwards. The best AI agents will then play the same game levels at the final match at 18:00. The winner of the challenge, man or machine, will be awarded with a prize of USD 250. Registration for the Man vs. Machine Challenge opens at 10:00 on July 28 at <http://aibirds.org>.

Best Papers in Sister Conferences Track

In continuation of the tradition started at IJCAI 2011, this track celebrates excellence in the field by featuring 15 presentations of award-winning papers from AI-related conferences. The track will run throughout the whole technical program.

The best papers that will be presented at IJCAI 2015 are from the following conferences:

AAMAS 2013, AAMAS 2014, HCOMP 2014, ICAPS 2014, ICCBR 2014, KR 2013, KR 2014, RecSys 2014, RR 2013, SoCS 2014, UAI 2014, and UMAP 2014.

Journal Track

July 28-31, 2015

Within the main program, various rooms (papers tagged “Journal Track”)

For the third time, throughout the technical program, IJCAI 2015 has a special track including 12 presentations of research results that have been published in the AI Journal or JAIR, ACM TIST, ACM TiS, IEEE Intelligent Systems and KRR in 2013 or 2014 and have never been presented at a conference before. This track is intended to give this work exposure to a large AI audience in a highly interactive setting. These papers will also be presented as posters and are accompanied by a 4-page extended abstract in the conference proceedings.

Closing event

July 31, 2015

18:30-20:00

Room LB

The closing event will include the award ceremony for the Angry Birds competitions, as well as the Best Presentation Award and the Best Poster Award. Moreover, you will listen to the plans for IJCAI 2016 in New York, USA. You will then be able to say goodbye to all your friends and colleagues while enjoying food and drinks.

IJCAI-15 schedule on your smartphone

The IJCAI schedule is available on your smartphone (iPhone or Android) via the “eventbase” app.

To use this, download the free eventbase app from the Apple or Android store, then click on “Conferences” and search for “IJCAI-15”. When it finds the event, click on it and launch the event guide. You can use the app to create a personal schedule with reminders.

Eventbase is widely used by conferences and other similar events - you can use the same app for other conferences in the future.

To download Eventbase:

Participant registration for IJCAI 2015

Onsite registration will be located from Saturday, July 25 to Monday Morning, July 27 at New Building of Facultad de Ciencias Económicas and from Monday Afternoon, July 27 to Friday, July 31 at the Conference Desk at the second floor of the Sheraton Convention Center. All attendees must pick up their registration packets for admittance to programs. **Please note that new onsite registrations will be processed only online with credit card payment option!**

Registration Desk Schedule

| DAY | LOCATION | TIME |
|-------------------|--------------------------------------------------------------------------------------------------------------|---------------------------|
| Saturday July 25 | New Building, Facultad de Ciencias Económicas (Workshop Site) | 7:30-17:30 |
| Sunday July 26 | New Building, Facultad de Ciencias Económicas (Workshop Site) | 7:30-17:30 |
| Monday July 27 | New Building, Facultad de Ciencias Económicas (morning only) and Sheraton Convention Center (afternoon only) | 7:30-12:30 15:30-18:30 |
| Tuesday July 28 | Sheraton Convention Center (Conference Desk) | 8:00-17:30 |
| Wednesday July 28 | Sheraton Convention Center (Conference Desk) | 8:00-17:30 |
| Thursday July 30 | Sheraton Convention Center (Conference Desk) | 8:00-17:30 |

Tour information

The services described on this page (airport pick-up, accommodation, tours during and after the convention) are provided by the IJCAI-15 tour operator- TIPGROUP (which is the most important in Argentina). Please send payment for services provided here directly to TIPGROUP.

AIRPORT PICK-UP SERVICE

| | |
|--------------------|---------|
| Car (1-2 pers) | USD 60 |
| Utility (3-4 pers) | USD 75 |
| Van (5-8 pers) | USD 120 |

** Committee representative will hold a sign with IJCAI-15 logo at the exit, where clients have finished all procedures at Immigration and Customs, and have de-clared their luggage.

** Clients taking irregular-size luggage or more than one big suitcase per person had better order a bigger size vehicle.

** Groups with more than 8 people please send enquiries to tour-ijcai2015@tipgrouptravel.com

** Payment for the above service should arrive at the Tipgroup account before 30th, Jun.

BUENOS AIRES HALF DAY TOURS

City Tour

- Tour code: CITYT
- Highlights: Plaza de Mayo, San Telmo, La Boca, Recoleta, Palermo and Puerto Madero
- Booking on site price: USD 20
- Duration-approx: 3.0 hour
- Departure date: Daily AM or PM
- Departure time: from 08:45am or 1:45pm
- Departure point: The Hotel you are staying at

Description:

This tour gives you the emotion of a multiple Buenos Aires. We will see the symbol of our city: the obelisk at the wide 9th of July Ave, close to the opera house (Colon Theater). We will visit different squares such as Plaza de Mayo where you will feel the presence of "The Mothers" marching in front of The Pink House.

You will enjoy the colonial houses at San Telmo and Montserrat and be impressed by "La Bombonera" (soccer stadium) at the colorful neighborhood of La Boca.

By visiting Puerto Madero you will see the most modern towers and five-star hotels surrounded by the best beef restaurants of this harbor.

You will see elegant neighborhoods such as Palermo,

drive along its avenues decorated with ancient trees and reach Recoleta, with its private cemetery (Evita's grave) and the National Library Building. When going back to the hotel you will see the huge embassies and palaces that belonged to the aristocracy.

Delta and North Zone

- Tour code: TIGHD
- Highlights: Tigre City, boat trip through the Delta and San Isidro neighborhood
- Booking on site price: USD 35
- Duration-approx: 4.0 hour
- Departure date: Daily AM
- Departure time: from 08:45am
- Departure point: The Hotel you are staying at

Description:

By watching the Delta you will appreciate the generosity of nature in a very singular place. We will leave Buenos Aires City and go to the north of the Great Buenos Aires looking at the natural scenery of the Delta and its islands. The lifestyle of the "isleños" (people who live on the islands) is very special. We will know their traditions, culture and their way of life. We will also see elegant residences located in the residential neighborhoods of the northern suburbs. We will visit the San Isidro neighborhood and the Amazing Cathedral. On the way back to Buenos Aires City, we will pass next to the Presidential Residence (Quinta de Olivos where all the Argentinian Presidents use to live during their Presidential period) and River Plate soccer stadium.

Two Passions of Buenos Aires: Tango & Football

- Tour code: DOSPA
- Highlights: Carlos Gardel Museum, La Boca and La bombonera
- Booking on site price: USD 32
- Duration-approx: 3.5 hours
- Departure date: Mondays to Saturdays AM
- Departure time: from 08:45am
- Departure point: The Hotel you are staying at

Description:

You will feel the two most important Passions of Buenos Aires City. Each corner tells a story when we talk about the Traditional music of Buenos Aires. We will visit the Carlos Gardel Museum, The Museum of the most important Tango Singer ever, the traditional corners, brave air, and the real Character of our city. We will also visit La Boca neighborhood, one of the most traditional neighborhoods of Buenos Aires. This neighborhood has

a great personality, and it is one of the most important when we talk about Football in Buenos Aires. People who want to live this passion could visit the Boca Juniors Stadium known as La Bombonera (optional), and explore the colorful streets.

Personalities Buenos Aires (Evita-Borges)

- Tour code: PERSO
- Booking on site price: USD 42
- Duration-approx: 4.0 hours
- Departure date: Tuesdays to Saturdays PM
- Departure time: from 1:45pm
- Departure point: The Hotel you are staying at

Description:

We will visit different places. The cemetery of La Recoleta (tickets not included), and we will travel through our history. We will find mausoleums and tombs of the national heroes and ancestors of the most traditional families of Buenos Aires, while walking along the narrow streets of the cemetery. We will also visit the exclusive neighborhoods of La Recoleta, Palermo, Belgrano. We will know the area where Jorge Luis Borges spend part of his life. The National Library Building, and Evita's Museum, a place where our guides are going to make you feel, and understand the work and life of the most important woman of Argentina. It is a great mixture of history, culture and art. The price includes Evita's Museum Tickets.

Navegation Lunch

- Tour code: HUMBE
- Highlights: boat trip, lunch, the best view of BA
- Booking on site price: USD 46
- Duration-approx: 3.0 hour
- Departure date: Mondays to Saturdays
- Departure time: from 12:45pm
- Departure point: The Hotel you are staying at

Description:

Visit the city and have lunch for two hours in a boat trip through the Río de la Plata, in a ship full of pleasure and beauty with the best view of Buenos Aires city. Enjoy the excellent cooking aboard in its completely panoramic saloon. The price includes: Transportation and lunch aboard. Drinks are not included.

BUENOS AIRES FULL DAY TOURS

Tigre and Delta Full Day

- Tour code: TIGFD
- Highlights: Tigre City, traditional market, boat trip through the Delta, lunch and San Isidro neighborhood
- Booking on site price: USD 80
- Duration-approx: 6.0 hour
- Departure date: Daily AM
- Departure time: from 08:45am
- Departure point: The Hotel you are staying at

Description:

We will know about the traditions, culture and lifestyles of the "isleños" (people who live in the islands); we will have lunch enjoying a great view of the river. We will visit the most traditional market at Puerto de Frutos and then we will go to this natural scenery and will sail into the islands. After that, we will visit the elegant residences located in the residential neighborhoods of the northern suburbs. You will see San Isidro neighborhood, its history and people. There, we will make a stop. On the way back to Buenos Aires, we will go through the Presidential Residence (Quinta de Olivos). On Sundays, the tour can end, if you want, in San Telmo neighborhood, where you can see the most important Flea and antique Market in the City. The price includes lunch without drinks.

Gacho's Experience at Santa Susana's Ranch

- Tour code: STSUS
- Highlights: Gaucho, Horses, chorizo, beef, red wine
- Booking on site price: USD 90
- Duration-approx: 9.0 hours
- Departure date: Tuesday to Sundays AM
- Departure time: from 9:30am
- Departure point: The Hotel you are staying at

Description:

It is a unique experience to Santa Susana's Ranch. In this tour you will find the Gaucho's Countryside life, and the peace of the place where he lives. It is a great experience to know about the Argentine Tradition. We invite you to ride horses, make a trip in a Sulkie, the traditional carriage that people used to have in the countryside. In this tour you will see traditional dances, gaucho's skills exhibitions and more. Our tour includes: Transportation, Tour guide, lunch and drinks, traditional dances, gaucho's exhibition, coffee, tea, mate and mate cocido (a typical beverage of the countryside)

Colonia (Uruguay)

- Tour code: COLBQ
- Booking on site price: USD 120
- Duration-approx: 12.00 hours
- Departure date: Daily AM
- Departure time: to be confirmed
- Departure point: Buquebus Port

Description:

Escape the hustle and bustle of Buenos Aires and immerse yourself in the atmosphere of the historic Uruguayan town of Colonia del Sacramento. On this day trip, take a three hours scenic ferry ride from Buenos Aires across the Rio de la Plata and enjoy a city sightseeing tour and walking tour of Colonia. Then, enjoy a delicious lunch at a quality restaurant of your choice (own expense) and spend the afternoon exploring the city of Colonia at your leisure

Description:

Round trip transportation (Hotel/Tango show/Hotel)
Dinner with wide menu: typical Argentine dishes and an exclusive selection of wines is included.

After dessert, you will enjoy a one and a half hour tango show with a live orchestra, several couples dancing and professional singers.

You will be witness to the evolution of the “Tango” through history (milonga, arrabalero and modern tango) in a true scenery with a mystic atmosphere.

Esquina Homero Manzi USD 45

Cafe de los Angelitos USD 60

La Ventana Tango USD 65

Esquina Carlos Gardel USD 70

Montevideo (Uruguay)

- Tour code: MVDBQ
- Booking on site price: USD 300
- Duration-approx: 14.00 hours
- Departure date: Daily AM
- Departure time: 06:30am
- Departure point: Buquebus Port

Description:

Enjoy a full-day trip from Buenos Aires to Montevideo, the capital city of Uruguay. Known for its theater scene and cultural heritage, Montevideo offers an array of sightseeing options in both its old and new areas. Take a scenic ferry ride there from Buenos Aires, and enjoy a city tour before enjoying a delicious lunch and exploring the city at your leisure. Ferry tickets, lunch and a city tour are all included.

BUENOS AIRES NIGHT TOURS**Dinner Tango Show**

- Tour code: TANGO
- Highlights: Historical Tango Houses, Dinner and drinks, Tango Rhythms, Live Orchestra, Typical costumes.
- Booking on site price: from USD 45
- Duration-approx: 4.0 hour
- Departure date: Daily Evenings
- Departure time: from 7:30pm
- Departure point: The Hotel you are staying

IJCAI 2015 Exhibit program

Alibaba.com

Alibaba group's mission is to make it easy to do business anywhere. We operate leading online and mobile marketplaces in retail and wholesale trade, as well as cloud computing and other services. We provide technology and services to enable consumers, merchants, and other participants to conduct commerce in our ecosystem. We aim to build the future infrastructure of commerce. We envision that our customers will meet, work and live at Alibaba, and that we will be a company that lasts at least 102 years.

Adobe

www.adobe.com/

Adobe is the global leader in digital marketing and digital media solutions. Our tools and services allow our customers to create groundbreaking digital content, deploy it across media and devices, measure and optimize it over time and achieve greater business success. We help our customers make, manage, measure and monetize their content across every channel and screen.

Baidu

www.baidu.com

Baidu was founded in 2000 by Internet search pioneer Robin Li, with the mission of providing the best and most equitable way for people to find what they're looking for. Over the past 15 years we have strived to fulfill this mission by listening to our users and truly understanding their needs. To provide intelligent, relevant search results for the tens of billions of queries that are entered into our search platform every day, we focus on powering the best technology optimized for up-to-date local tastes and preferences, with a deep, nuanced insights into the Chinese language. In recent years, we've transitioned from a PC-centric to a mobile-first company, and currently over 50 percent of our revenues come from mobile. With a leading position in mobile search, mobile maps, and app distribution, Baidu is well positioned to capture the next opportunity: Connecting people with services in closed-loop transactions.

BigML

<https://bigml.com>

Cheap cloud computing and storage services have led to a huge increase in the amount of data accumulated. Companies with large numbers of analysts can gain valuable insight from their data. However, not everyone can afford such a team, let alone find the individuals with the right skill. There is a strong need for a new service that puts predictive power in the hands of many. Our goal is to make machine learning simple and beautiful. Our service can take the complexities out of creating a

high-availability, low-latency Machine Learning system created especially for your data. You will not only gain valuable insights from your data, you will most likely enjoy it. From the developer, to the researcher, to the multinational corporation, BigML has something that can uncover the hidden predictive power of your data. BigML wants to make you the master of your data.

CoInvent

<http://www.coinvent-project.eu/>

COINVENT is an effort to advance the understanding of creativity and its computational realisation. It is funded by FET within the 7th Framework Programme for Research of the European Commission (grant agreement number 611553) that runs from October 2013 to September 2016. COINVENT investigates mathematical models of general cognitive principles that operate when new concepts are invented, so as to be able to engineer computer systems that effectively support humans in their creative thinking. COINVENT focuses on the mathematical formalisation and the computational implementation of conceptual blending, a fundamental cognitive operation intrinsic to everyday thought and language. By conceptual blending humans combine particular elements and their relations of originally separate mental spaces into a unified space, in which new elements and relations emerge and new inferences are drawn. COINVENT brings together a team of scientists of Europe's leading universities and research centres in formal systems, cognitive science, artificial intelligence, computational creativity, mathematical reasoning and cognitive musicology, with the objective of bringing about a computational creative system to be deployed in two representative working domains of creativity: mathematics and music. COINVENT is coordinated by IIIA-CSIC, Barcelona, Spain, and has as partners: University of Edinburgh, Osnabrück University, Otto-von-Guericke University Magdeburg, Goldsmiths University of London, Aristotle University of Thessaloniki, University of Dundee, and Free University of Bozen-Bolzano.

ESSENCE

<http://www.essence-network.com>

ESSENCE (Evolution of Shared Semantics in Computational Environments) is a European research training network that aims to translate the capabilities that enable human societies to negotiate and evolve meaning in communication to computational systems. The four-year programme is carried out by a multidisciplinary consortium composed of leading research groups in AI, linguistics, semantic technologies, and evolutionary robotics, as well as industrial and governmental organisations from six countries. It aims to build a sustainable European research base in the area by training 15 junior PhD researchers and organising a host of international

events that will help bring together expertise from such areas as language evolution, autonomous decision making, knowledge representation and reasoning, and computational linguistics. For more information, please visit our website.

Facebook

<https://www.facebook.com>

Facebook is a popular free social networking website that allows registered users to create profiles, upload photos and video, send messages and keep in touch with friends, family and colleagues. Founded in 2004, Facebook's mission is to give people the power to share and make the world more open and connected. People use Facebook to stay connected with friends and family, to discover what's going on in the world, and to share and express what matters to them.

Google Inc.

research.google.com

Google's mission is to organize the world's information and make it universally accessible and useful. Perhaps as remarkable as two Stanford research students having the ambition to found a company with such a lofty objective is the progress the company has made to that end. Ten years ago, Larry Page and Sergey Brin applied their research to an interesting problem and invented the world's most popular search engine. The same spirit holds true at Google today. The mission of research at Google is to deliver cutting-edge innovation that improves Google products and enriches the lives of all who use them. We publish innovation through industry standards, and our researchers are often helping to define not just today's products but also tomorrow's.

Huawei

www.huawei.com

Huawei is a leading global ICT solutions provider. Through our dedication to customer-centric innovation and strong partnerships, we have established end-to-end capabilities and strengths across the carrier networks, enterprise, consumer, and cloud computing fields. We are committed to creating maximum value for telecom carriers, enterprises and consumers by providing competitive ICT solutions and services. Our products and solutions have been deployed in over 140 countries, serving more than one third of the world's population.

IBM Research

www.ibm.com

IBM has developed a thoughtful, comprehensive approach to corporate citizenship that we believe aligns with IBM's values and maximizes the impact we can make as a global enterprise. We focus on specific societal issues, including the environment, community economic development,

education, health, literacy, language and culture. IBM is committed to environmental leadership in all of our business activities. Our global environmental management system ensures the company is vigilant in protecting the environment across all of its operations worldwide.

INSIGHT

<http://www.insightproject.eu/>

The Insight Project is a consortium funded by the EU Seventh Framework Programme for research, technological development and demonstration under grant agreement no 308943, within the program of FET Open. The project offers and elaborates the Neural Replicator Hypothesis (NRH) stating that the missing ingredient for reaching adequate models of intelligence is true Darwinian neurodynamics of replicators within the brain. INSIGHT is based on, and refines, plausible neurobiological foundations of neuronal replicators. It attempts to show that Darwinian neurodynamics offers a credible and efficient algorithm for approximate Bayesian inference in the brain. The project is coordinated by Eors Szathmáry from the Parmenides Foundation in Munich (Germany) and includes the University of Sussex, the Universitat Pompeu Fabra, the Ecole Polytechnique de Lausanne, and IN Project Management from Udine.

Medallia

At Medallia we collect, analyze and display terabytes of structured and unstructured data for our multi-billion dollar clients in real time. We mix academy innovation with industry technology to create tools that help our clients understand their information and provide a better service. We build products on top of machine learning techniques including sentiment analysis, automatic topic discovery and time series analysis for anomaly detection. Get to know more about us at www.medallia.com

Microsoft Research

www.microsoft.com

At Microsoft, we're motivated and inspired every day by how our customers use our software to find creative solutions to business problems, develop breakthrough ideas, and stay connected to what's most important to them. We are committed long term to the mission of helping our customers realize their full potential. Just as we constantly update and improve our products, we want to continually evolve our company to be in the best position to accelerate new technologies as they emerge and to better serve our customers.

PRAISE

<http://www.iiia.csic.es/praise/>

PRAISE is a social network for music education with tools for giving and receiving feedback. It aims to widen access to music education and make learning music more

a supportive, social environment using the latest techniques in social networks, online community building, intelligent personal agents and audio and gesture analysis. Any member of any community can post audio to any community for which they are a member and ask for specific kinds of feedback on various regions of that audio. Any community member can respond with text, or with other audio to emphasize a particular point about style or performance for example. PRAISE enables online virtual communities of students with shared interests or goals to come together to share their music practice and music goals with each other so the process of learning can become social and shared and giving positive feedback and constructive criticism each other is part of the fabric of the community.

Tencent

Founded in November, 1998, Tencent has grown into one of China's largest and most used Internet service portal. Since its establishment over the last decade, Tencent has maintained steady growth under its user-oriented operating strategies. It is Tencent's mission to enhance the quality of human life through Internet services. Presently, Tencent is providing value-added Internet, mobile and telecom services and online advertising under the strategic goal of providing users with "one-stop online lifestyle services". The development of Tencent has profoundly influenced the ways hundreds of millions of Internet users communicate with one another as well as their lifestyles. It also brings possibilities of a wider range of applications to the China's Internet industry. Looking forward, Tencent remains committed to enhancing its development and innovation capabilities while strengthening its nationwide branding for its long term development. Tencent's long term vision is to become the most respected Internet enterprise. In order to fulfill corporate social responsibilities and to promote civil Internet communities, Tencent has been actively participating in public charity programs. In 2006, Tencent inaugurated the Tencent Charity Fund, the first charity foundation set up by a Chinese Internet enterprise, and the public charity website gongyi.qq.com. The website focuses on youth education, assisting impoverished communities, care for the disadvantaged, and disaster relief. Tencent has currently begun a number of public charity projects across China. It strives to help build a harmonious society and to become a good corporate citizen.

Elsevier

www.elsevier.com/computerscience

Elsevier is committed to making important contributions to the artificial intelligence community by delivering world-class information and innovative tools. Elsevier's Artificial Intelligence, which commenced publication in 1970, is now the generally accepted premier international forum for the publication of results of current research in this field. The journal welcomes foundational and applied papers describing mature work involving computational accounts of aspects of intelligence. Please visit us at our stand or visit www.elsevier.com/computerscience for more information about Artificial Intelligence journal and Elsevier.

Springer

www.springer.com

Looking to publish your research? Discover Springer's print and electronic publication services, including open access! Get high quality review, maximum readership and rapid distribution. Visit our booth or springer.com/authors. You can also browse key titles in your field and buy (e)books at discount prices. With Springer you are in good company.

IJCAI-16

www.ijcai-16.org

The booth will display the IJCAI-16 poster as well as materials about New York. The booth will be manned by researchers of the Local Arrangements Committee who can answer questions regarding the organization of IJCAI 2016 in New York, USA.

IJCAI-17

www.ijcai-17.org

We will have a booth to publicize the forthcoming IJCAI-17 conference in Melbourne, Australia.

| | | | CS100 | Modeling Multi–Attribute Demand for Sustainable Cloud Computing With Copulae | Maryam Ghasemi, Benjamin Lubin |
| 10:40 – 11:10 | | Poster 1 | Coffee and Poster 1 | | |
| 11:10 – 12:10 | ROOM GH | Sist1 Sister Track: Games, Probability & Ontologies | Sist1 | Near–Optimal Approximation Mechanisms for Multi–Unit Combinatorial Auctions (from AAMAS’13) | Piotr Krysta |
| | | | Sist4 | Reasoning with Probabilistic Ontologies (from RR’13) | Fabrizio Riguzzi |
| | | | Sist6 | FireFly Monte Carlo: Exact MCMC with Subsets of Data (from UAI’14) | Dougal Maclaurin and Ryan Adams |
| 11:10 – 12:10 | ROOM LB1 | Main 4 Game Theory 2 | Main 550 | Fixing tournaments for kings chokers and more | |
| | | | Main 429 | Gibbard–Satterthwaite Games | Edith Elkind, Umberto Grandi, Francesca Rossi, Arkadii Slinko |
| | | | Main 720 | Truthful Cake Cutting Mechanisms with Externalities: Do not make them care for others too much! | Minming Li, Jialin Zhang, Qiang Zhang |
| 11:10 – 12:10 | ROOM LB2 | Main 5 Natural Language Processing 1 | Main 812 | Automated Rule Selection for Aspect Extraction in Opinion Mining | Qian Liu, Zhiqiang Gao, Bing Liu, Yuanlin Zhang |
| | | | Main 791 | Prior–based Dual Additive Latent Dirichlet Allocation for User–item Connected Documents | Wei Zhang, Jianyong Wang |
| | | | Main 1412 | Joint POS Tagging and Text Normalization for Informal Text | Chen Li, Yang Liu |
| | | | Main 830 | Multi–Document Abstractive Summarization Using ILP based Multi–Sentence Compression | Siddhartha Banerjee, Prasenjit Mitra, Kazunari Sugiyama |
| 11:10 – 12:10 | ROOM LB3 | Main 6 Multiagent Systems 1 | Main 363 | Strategy–Proofness of Scoring Allocation Correspondences for Indivisible Goods | Nhan–Tam Nguyen, Dorothea Baumeister, Joerg Rothe |
| | | | Main 284 | What Do We Elect Committees For? A Voting Committee Model for Multi–Winner Rules | Piotr Skowron |
| | | | Main 101 | Equilibria Under the Probabilistic Serial Rule | Haris Aziz, Serge Gaspers, Simon Mackenzie, Nicholas Mattei, Nina Narodytska, Toby Walsh |
| | | | Main 1124 | Estimating the Margin of Victory of Elections using Sampling | Palash Dey, Y. Narahari |

DAY 1

TUESDAY, JULY 28TH

| | | | | | |
|---------------|---------|----------------------------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| 11:10 – 12:10 | ROOM LP | KR2 KR Track: DL and Ontologies 1 | KR25 | Polynomial Rewritings for Linear Existential Rules | Georg Gottlob, Marco Manna, Andreas Pieris |
| | | | KR98 | Efficient Query Rewriting in the Description Logic EL and Beyond | Peter Hansen, Carsten Lutz, Inanc Seylan, Frank Wolter |
| | | | KR106 | Query Rewriting for Existential Rules with Compiled Preorder | Mélanie König, Michel Leclère, Marie–Laure Mugnier |
| | | | KR132 | The Combined Approach to Query Answering Beyond the OWL 2 Profiles | Cristina Feier, David Carral, Giorgio Stefanoni, Bernardo C. Cuenca Grau, Ian Horrocks |
| 11:10 – 12:10 | ROOM R1 | Main 7 Recommender Systems 1 | Main 140 | Exploring Implicit Hierarchical Structure for Recommender Systems | Suhang Wang, Jiliang Tang, Huan Liu, Yilin Wang |
| | | | Main 119 | Simple Atom Selection Strategy for Greedy Matrix Completion | Zebang Shen, Hui Qian |
| | | | Main 589 | Personalized Tour Recommendation based on User Interests and Points of Interest Visit Durations | Kwan Hui Lim, Jeffrey Chan, Christopher Leckie, Shanika Karunasekera |
| 11:10 – 12:10 | ROOM R2 | ML2 ML Track: New Problems | ML35 | Collaborative Place Models | Berk Kapicioglu, David S. Rosenberg, Robert E. Schapire, Tony Jebara |
| | | | ML105 | Introspective Forecasting | Loizos Michael |
| | | | ML438 | Sketch the Storyline with CHARCOAL: a Non–parametric Approach | Siliang Tang, Wu Fei, Si Li, Zhongfei Zhang |
| | | | ML558 | Open Domain Short Text Conceptualization: A Generative + Descriptive Modeling Approach | Yangqiu Song, Shusen Wang, Haixun Wang |
| 11:10 – 12:10 | ROOM R3 | Main 70 Heuristic Search 1 | Main 159 | Mining Expert Play to Guide Monte Carlo Search in the Opening Moves of Go | Steinmetz Erik, Maria L. Gini |
| | | | Main 1102 | Computing Possibly Optimal Solutions for Multi–Objective Constraint Optimisation with Tradeoffs | Nic Wilson, Razak Abdul, Radu Marinescu |
| | | | Main 93 | Generalized Rapid Action Value Estimation | Tristan Cazenave |
| | | | Main 1253 | Efficient Search with an Ensemble of Heuristics | Mike Phillips, Venkatraman Narayanan, Sandip Aine, Maxim Likhachev |
| 12:10 – 12:30 | | Poster 2 | Poster 2 | | |
| 12:30 – 14:00 | | Lunch 1 | Lunch | | |
| 14:00 – 15:00 | ROOM LB | Invited 1 | Invited 1 | Invited Talk 1: Julien Cornebise Towards General Artificial Intelligence | Dr. Julien Cornebise |
| 14:00 – 15:00 | ROOM R | Invited 2 | Invited 2 | Invited Talk 2: Christof Koch Consciousness in Biological and Artificial Brains | Christof Koch |
| 15:00 – 15:10 | | Transition 2 | | Transition | |
| 15:10 – 16:30 | ROOM GH | Jnl1 Journal Track: Natural Language Processing | Journal 17 | New Avenues in Opinion Mining and Sentiment Analysis [Extended Abstract] | Erik Cambria |
| | | | Journal 18 | Phrase Detectives: Utilizing Collective Intelli- gence for Internet–Scale Language Resource Creation (Extended Abstract) | Massimo Poesio |
| | | | Journal 19 | Developing Corpora for Sentiment Analysis: The Case of Irony and Senti–TUT (Extended abstract) | Cristina Bosco |
| | | | Journal 20 | Feature Ensemble Plus Sample Selection: Domain Adaptation for Sentiment Classification [Extended Abstract] | Rui Xia |
| | | | Journal 21 | Enhanced SenticNet with Affective Labels for Concept–based Opinion Mining [Extended Abstract] | Soujanya Poria |

| | | | | | |
|---------------|----------|----------------------------------------------------------------|-----------|--------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| 15:10 – 16:30 | ROOM LB1 | Main 8 Game Theory 3 | Main 432 | Learning Cooperative Games | Maria F Balcan, Ariel D. Procaccia, Yair Zick |
| | | | Main 808 | Influence in Classification via Cooperative Game Theory | Amit Datta, Anupam Datta, Ariel D. Procaccia, Yair Zick |
| | | | Main 658 | Simultaneous Abstraction and Equilibrium Finding in Games | Noam Brown, Tuomas Sandholm |
| | | | Main 521 | Solving Heads-up Limit Texas Hold'em | Oskari Tammelin, Neil Burch, Michael Johanson, Michael Bowling |
| 15:10 – 16:30 | ROOM LB2 | ML-ISC1 ML Track: Invited Sister Conference Presentations 1 | ML-ISC1 | Learning in the Model Space | Huanhuan Chen |
| | | | ML-ISC2 | Fast Spatio-temporal Analysis via Low Rank Tensor Learning | Yan Liu |
| | | | ML-ISC3 | Languages for Mining and Learning | Luc de Raedt |
| | | | ML-ISC4 | Learning as Interpretation | Stephen Muggleton |
| 15:10 – 16:30 | ROOM LB3 | Main 10 Web Mining 1 | Main 152 | Tackling Data Sparseness in Recommendation using Social Media based Topic Hierarchy Modeling | Xingwei Zhu, Zhao-Yan Ming, Yu Hao, Xiaoyan Zhu |
| | | | Main 1446 | Catch the Black Sheep: Unified Shilling Attack Detection based on Fraudulent Action Propagation | Yongfeng Zhang, Yunzhi Tan, Min Zhang, Yiqun Liu, Shaoping Ma |
| | | | Main 17 | Detecting Promotion Campaigns in Community Question Answering | Xin Li, Yiqun Liu, Min Zhang, Shaoping Ma, Xuan Zhu, Jiashen Sun |
| | | | Main 1504 | Learning Geographical Hierarchy Feature for Image Location Prediction | Zhang Xiaoming, Xia Hu |
| 15:10 – 16:30 | ROOM LP | KR3 KR Track: DL and Ontologies 2 | KR40 | The Complexity of Subsumption in Fuzzy EI | Stefan Borgwardt, Marco Cerami, Rafael Peñaloza |
| | | | KR123 | Efficient Paraconsistent Reasoning with Ontologies and Rules | Tobias Kaminski, Matthias Knorr, Joao Leite |
| | | | KR133 | First-Order Rewritability of Ontology-Mediated Temporal Queries | Alessandro Artale, Roman Kontchakov, Alisa Kovtunova, Vladislav Ryzhikov, Frank Wolter, Michael Zakharyashev |
| | | | KR260 | Verification of Generalized Inconsistency-Aware Knowledge and Action Bases | Diego Calvanese, Marco Montali, Ario Santoso |
| 15:10 – 16:30 | ROOM R1 | Main 11 Natural Language Processing 2 | Main 823 | Iterative Learning of Parallel Lexicons and Phrases from Non-Parallel Corpora | Meiping Dong, Yang Liu, Maosong Sun |
| | | | Main 874 | Learning Context-Sensitive Word Embeddings with Neural Tensor Skip-Gram Model | PengFei Liu, Xipeng Qiu, Xuanjing Huang |
| | | | Main 252 | Representation Learning for Measuring Entity Relatedness with Rich Information | Yu Zhao, Zhiyuan Liu, Maosong Sun |
| | | | Main 982 | Local Translation Prediction with Global Sentence Representation | Jiajun Zhang |
| | | | Main 164 | Joint Learning of Character and Word Embeddings | Lei Xu, Xinxiong Chen, Zhiyuan Liu, Maosong Sun, Huanbo Luan |
| 15:10 – 16:30 | ROOM R2 | ML3 ML Track: Transfer Learning and Multi-task Learning | ML78 | Multi-Task Model and Feature Joint Learning | Ya Li, Xinmei Tian, Tongliang Liu, Dacheng Tao |
| | | | ML106 | Deep Low-Rank Coding for Transfer Learning | Zhengming Ding, Ming Shao, Yun Fu |
| | | | ML142 | Multi-task Multi-view Clustering for Non-negative Data | Xianchao Zhang, Xiaotong Zhang, Han Liu |
| | | | ML174 | Portable Option Discovery for Automated Learning Transfer in Object-Oriented Markov Decision Processes | Nicholay Topin, Nicholas Haltmeyer, Shawn Squire, John Winder, Marie desJardins, James MacGlashan |
| | | | ML340 | Multi-task Multi-dimensional Hawkes Processes for Modeling Event Sequences | Dixin Luo, Hongteng Xu, Yi Zhen, Xia Ning, Hongyuan Zha |
| | | | ML350 | Multitask Coactive Learning | Robby Goetschalckx, Alan Fern, Prasad Tadepalli |

DAY 1

TUESDAY, JULY 28TH

| | | | | | |
|---------------|----------|-----------------------------------------------------|---------------------|-------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| 15:10 – 16:30 | ROOM R3 | ML4 ML Track: Matrix Completion | ML230 | Word Embedding Revisited: A New Representation Learning and Explicit Matrix Factorization Perspective | Yitan Li, Linli Xu, Fei Tian, Liang Jiang |
| | | | ML311 | Matrix Factorization with Scale-Invariant Parameters | Guangxiang Zeng, Hengshu Zhu, Qi Liu, Ping Luo, Enhong Chen, Tong Zhang |
| | | | ML414 | Accelerated Inexact Soft-Impute for Fast Large-Scale Matrix Completion | Quanming Yao, James Kwok |
| | | | ML473 | Scalable Probabilistic Tensor Factorization for Binary and Count Data | Piyush Rai, Changwei Hu, Lawrence Carin |
| 16:30 – 17:00 | | Poster 3 | Coffee and Poster 3 | | |
| 17:00 – 18:00 | ROOM GH | Main 71 Model Verification / Model Checking | Main 1297 | The Complexity of Model Checking Succinct Multiagent Systems | Xiaowei Huang |
| | | | Main 218 | Pushdown Multi-Agent System Verification | Aniello Murano, Giuseppe Perelli |
| | | | Main 688 | Verifying Emergent Properties of Swarms | Alessio Lomuscio, Panagiotis Kouvaros |
| | | | Main 672 | Symbolic model-checking for single resource RB+-ATL | Natasha Alechina, Brian Logan, Hoang Nga Nguyen, Franco Raimondi |
| 17:00 – 18:00 | ROOM LB1 | Main 73 Constraints, Satisfiability and Search 1 | Main1 078 | Multi-Armed Bandits for Adaptive Constraint Propagation | Amine Balafrej, Anastasia Paparrizou, Christian Bessiere |
| | | | Main 608 | Efficient Algorithms with Performance Guarantees for the Stochastic Multiple-Choice Knapsack Problem | Long Tran-Thanh, Yingce Xia, Tao Qin, Nick Jennings |
| | | | Main 1383 | Personalized Mathematical Word Problem Generation | Oleksandr Polozov, Eleanor O'Rourke, Adam M. Smith, Luke Zettlemoyer, Sumit Gulwani, Zoran Popovi |
| 17:00 – 18:00 | ROOM LB2 | Main 13 Social Networks 1 | Main 1317 | Optimal Route Search with the Coverage of Users' Preferences | Xuefeng Chen, Yifeng Zeng, Xin Cao, Shengchao Qin, Marc Cavazza, Yanping Xiang |
| | | | Main 377 | How Robust is the Wisdom of the Crowds? | Noga Alon, Michal Feldman, Omer Lev, Moshe Tennenholtz |
| | | | Main 234 | Integrated Anchor and Social Link Predictions across Social Networks | Jiawei Zhang, Philip Yu |
| | | | Main 834 | Uncovering the Formation of Triadic Closure in Social Networks | Zhanpeng Fang, Jie Tang |
| 17:00 – 18:00 | ROOM LB3 | Main 14 Vision and Perception 1 | Main 796 | Face clustering in videos with proportion prior | Zhiqiang Tang, Yifan Zhang, lu Han Qing |
| | | | Main 1491 | Generalized Transitive Distance with Minimum Spanning Random Forest | Zhiding Yu, Weiyang Liu, Wenbo Liu, Xi Peng, Zhuo Hui, Vijayakumar Bhagavatula |
| | | | Main 693 | Saliency Detection with a Deeper Investigation of Light Field | Jun Zhang, Meng Wang, Jun Gao, Yi Wang, Xudong Zhang, Xindong Wu |
| 17:00 – 18:00 | ROOM LP | KR4 KR Track: DL and Ontologies 3 | KR41 | Temporal Query Answering in the Description Logic EL | Stefan Borgwardt, Veronika Thost |
| | | | KR42 | Beyond SPARQL under OWL 2 QL Entailment Regime: Rules to the Rescue | Georg Gottlob, Andreas Pieris |
| | | | KR82 | Controlled Query Evaluation for Datalog and OWL 2 Profile Ontologies | Bernardo C Cuenca Grau, Evgeny Kharlamov, Egor V. Kostylev, Dmitriy Zheleznyakov |
| | | | KR101 | Combining Existential Rules and Description Logics | Antoine Amarilli, Michael Benedikt |

| | | | | | |
|---------------|---------|--------------------------------------------------------------|-----------|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| 17:00 – 18:00 | ROOM R1 | Main 15 Auctions and Market-Based Systems | Main 779 | Mechanism Design and Search Algorithm for Lung Exchange | Suiqian Luo, Pingzhong Tang |
| | | | Main 876 | Selling Reserved Instances in Cloud Computing | Changjun Wang, Weidong Ma, Tao Qin, Xujin Chen, Xiaodong Hu, Tieyan Liu |
| | | | Main 1252 | Maximal Cooperation in Repeated Games on Social Networks | Catherine Moon, Vincent Conitzer |
| 17:00 – 18:00 | ROOM R2 | ML5 ML Track: High- Dimensional Data 1 | ML186 | Compressed Spectral Regression for Efficient Nonlinear Dimensionality Reduction | Deng Cai |
| | | | ML214 | Semi-Orthogonal Multilinear PCA with Relaxed Start | Qiquan Shi, Haiping Lu |
| | | | ML279 | Feature Selection from Microarray Data via an Ordered Search with Projected Margin | Saulo Villela, Saul C. Leite, Raul Fonseca Neto |
| | | | ML475 | Discriminative Unsupervised Dimensionality Reduction | Xiaoqian Wang, Feiping Nie, Heng Huang |
| 17:00 – 18:00 | ROOM R3 | ML6 ML Track: Online Learning and Sequential Data 1 | ML138 | Model Metric Co-learning for Time Series Classification | Huanhuan Chen, Fengzhen Tang, Peter Tino, Anthony Cohn, Xin Yao |
| | | | ML227 | Imaging Time-Series to Improve Classification and Imputation | Zhiguang Wang, Tim Oates |
| | | | ML299 | On the Runtime of Randomized Local Search and Simple Evolutionary Algorithms for Dynamic Makespan Scheduling | Frank Neumann, Carsten Witt |
| | | | ML418 | Unsupervised Condition Monitoring Using Segmental Hidden Markov Models | Chao Yuan |
| 18:00 – 19:00 | | Poster 4 | Poster 4 | | |

| Timetable | Place | Session | Paper ID | Title | Author/ Authors |
|---------------|----------|------------------------------------------------------------|-----------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| 08:30 – 10:10 | ROOM GH | Ind1 | Ind1 | Industry Session 1 Alibaba Group Holding Limited | |
| 08:30 – 10:10 | ROOM GH | Ind1 | Ind2 | Industry Session 1 Microsoft Corporation | |
| 08:30 – 10:10 | ROOM LB1 | Main 16 Game Theory 4 | Main 35 | Possible and Necessary Allocations via Sequential Mechanisms | Haris Aziz, Toby Walsh, Lirong Xia |
| | | | Main 1320 | Wisdom of Waze | Shoshana Vasserman, Michal Feldman, Avinatan Hassidim |
| | | | Main 1216 | Computing Optimal Mixed Strategies for Security Games with Dynamic Payoffs | Yue Yin, Haifeng Xu, Jiarui Gan, Bo An, Albert Xin Jiang |
| | | | Main 705 | A characterization of n-player strongly monotone scheduling mechanisms | Annamaria Kovacs, Angelina Vidal |
| | | | Main 545 | Spiteful Bidding in the Dollar Auction | Marcin Waniek, Agata Niescieruk, Tomasz P Michalak, Talal Rahwan |
| | | | Main 1217 | Strategic Network Formation through Intermediaries | Elliot Anshelevich, Onkar Bhardwaj, Koushik Kar |
| | | | Main 1201 | Optimal Network Security Hardening Using Attack Graph Games | Karel Durkota, Viliam Lisy, Branislav Bosansky, Christopher Kiekintveld |
| 08:30 – 10:10 | ROOM LB2 | Main 18 Vision and Perception 2 | Main 313 | Trailer Generation via A Point Process-based Visual Attractiveness Model | Hongteng Xu, Yi Zhen, Hongyuan Zha |
| | | | Main 226 | Social Image Parsing by Cross-Modal Data Refinement | Zhiwu Lu, Xin Gao, Liwei Wang, Songfang Huang |
| | | | Main 145 | Cross-View Projective Dictionary Learning for Person Re-identification | Sheng Li, Ming Shao, Yun Fu |
| | | | Main 954 | Modeling Inter- and Intra-Part Deformations for Object Structure Parsing | Cai Ling, Rongrong Ji |
| | | | Main 1480 | Adaptive Sharing for Image Classification | Li Shen, Gang Sun, Zhouchen Lin, Qingming Huang, Enhua Wu |
| | | | Main 13 | Salient Object Detection via Augmented Hypotheses | Nguyen Tam |
| | | | Main 670 | Video Covariance Matrix Logarithm for Human Action Recognition in Videos | Piotr T Bilinski, Francois Bremond |
| | | | Main 268 | Inferring Painting Style with Multi-task Dictionary Learning | Gaowen Liu, Yan Yan, Elisa Ricci, Yi Yang, Yahong Han, Nicu Sebe |
| | | | Main 139 | Semantic Single Video Segmentation with Robust Graph Representation | Handong Zhao, Yun Fu |
| | | | Main 995 | Efficient and Accurate Set Based Registration of Aerial Images | Arandjelovic Ognjen |
| 08:30 – 10:10 | ROOM LB3 | AIA2 AI&Arts: Music, Dance, Language, Visual Arts | AIA10 | Stroke-Based Stylization Learning and Rendering with Inverse Reinforcement Learning | Ning Xie, Tingting Zhao, Feng Tian, Xiaohua Zhang, Masashi Sugiyama |
| | | | AIA28 | Heroic vs Collaborative AI for the Arts | Jon McCormack, Mark d'Inverno |
| | | | AIA33 | Kinetic imaginations: Exploring the possibilities of combining AI and dance | Alexander Berman, Valencia James |
| | | | AIA36 | Pseudo-supervised training improves unsupervised melody segmentation | Stefan Lattner, Maarten Grachten, Carlos E. Cancino Chacón |
| | | | AIA52 | Learning to Rap Battle with Bilingual Recursive Neural Networks | Dekai Wu, Kartteek Addanki |

| | | | | | |
|---------------|---------|-------------------------------------------------|-------|---------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| 08:30 – 10:10 | ROOM LP | KR5 KR Track: Uncertainty reasoning | KR19 | A Logic for Reasoning about Justified Uncertain Beliefs | Tuan-Fang Fan, Churn-Jung Liao |
| | | | KR32 | Probabilistic Reasoning with Inconsistent Beliefs using Inconsistency Measures | Nico Potyka, Matthias Thimm |
| | | | KR136 | The cube of opposition – A structure underlying many knowledge representation formalisms | Didier Dubois, Henri Prade, Agnès Rico |
| | | | KR166 | Probabilistic belief contraction using argumentation | Kinzang Chhogyal, Abhaya Nayak, Zhiqiang Zhuang, Abdul Sattar |
| | | | KR189 | Probabilistic Inference in Hybrid Domains by Weighted Model Integration | Vaishak Belle, Andrea Passerini, Guy Van den Broeck |
| | | | KR261 | Tractable Learning for Structured Probability Spaces: A Case Study in Learning Preference Distributions | Arthur Choi, Guy Van den Broeck, Adnan Darwiche |
| | | | KR320 | Compatible-based conditioning in interval-based possibilistic logic | Salem Benferhat, Amélie Levray, Karim Tabia, Vladik Kreinovich |
| | | | KR702 | The Logic of Qualitative Probability | James Delgrande, Bryan Renne |
| 08:30 – 10:10 | ROOM R1 | ML7 ML Track: Reinforcement Learning 1 | ML354 | Robust Learning for Repeated Stochastic Games via Meta-Gaming | Jacob Crandall |
| | | | ML327 | Autonomous Cross-Domain Knowledge Transfer in Lifelong Policy Gradient Reinforcement Learning | Haitham Bou Ammar, Eric Eaton, Jose Marcio Luna, Paul Ruvolo |
| | | | ML511 | Symbol Acquisition for Probabilistic High-Level Planning | George Konidaris, Leslie Kaelbling, Tomas Lozano-Perez |
| | | | ML604 | Between Imitation and Intention Learning | James MacGlashan, Michael L. Littman |
| | | | ML623 | Policy Shaping With Human Teachers | Thomas Cederborg, Ishaan Grover, Charles L. Isbell Jr., Andrea Thomaz |
| | | | ML641 | Active Imitation Learning of Hierarchical Policies | Mandana Hamidi, Prasad Tadepalli, Robby Goetschalckx, Alan Fern |
| | | | ML668 | Inverse Reinforcement Learning in Relational Domains | Thibaut Munzer, Bilal Piot, Matthieu Geist, Olivier Pietquin, Manuel Lopes |
| 08:30 – 10:10 | ROOM R2 | ML8 ML Track: Multi-label Learning | ML139 | Using A* for Inference in Probabilistic Classifier Chains | Deiner Mena, Elena Montañés, José R. Quevedo, Juan J. del Coz |
| | | | ML211 | Crowdsourced Semantic Matching of Multi-Label Annotations | Lei Duan, Satoshi Oyama, Masahito Kurihara, Haruhiko Sato |
| | | | ML263 | Multi-label structure learning with Ising model selection | Andre R. Goncalves, Fernando J. Von Zuben, Arindam Banerjee |
| | | | ML306 | Towards Class-Imbalance Aware Multi-Label Learning | Min-Ling Zhang, Yu-Kun Li, Xu-Ying Liu |
| | | | ML427 | Polytree-Augmented Classifier Chains for Multi-Label Classification | Lu Sun, Mineichi Kudo |
| | | | ML458 | Semi-supervised Multi-label Learning with Incomplete Labels | Feipeng Zhao, Yuhong Guo |
| | | | ML478 | Multi-label Classification with Feature-aware Non-linear Label Space Transformation | Xin Li, Yuhong Guo |

DAY 2

WEDNESDAY, JULY 29TH

| | | | | | |
|---------------|----------|--------------------------------------------------------------------|---------------------|----------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| 08:30 – 10:10 | ROOM R3 | Jnl2 Journal Track: Reasoning, Learning & Social Media | Journal 1 | Complexity-Sensitive Decision Procedures for Abstract Argumentation (Extended Abstract) | Wolfgang Dvořák, Matti Järvisalo, Johannes Peter Wallner, Stefan Woltran |
| | | | Journal 2 | Common Sense Reasoning for Detection Prevention and Mitigation of Cyberbullying (Extended Abstract) | Karthik Dinakar, Rosalind Picard, Henry Lieberman |
| | | | Journal 3 | Inapproximability of Treewidth and Related Problems (Extended Abstract) | Yu Wu, Per Austrin, Toniann Pitassi, David Liu |
| | | | Journal 4 | Influencing Individually: Fusing Personalization and Persuasion Extended Abstract | Shlomo Berkovsky, Jill Freyne, Harri Oinas-Kukkonen |
| | | | Journal 10 | The Arcade Learning Environment: An Evaluation Platform for General Agents (Extended Abstract) | Marc G. Bellemare, Yavar Naddaf, Joel Veness, Michael Bowling |
| | | | Journal 6 | Using Social Media to Enhance Emergency Situation Awareness: Extended Abstract | Jie Yin, Harri Oinas-Kukkonen, Andrew Lampert, Mark Cameron, Bella Robinson, Robert Power |
| 10:10 – 10:40 | | Poster 5 | Coffee and Poster 5 | | |
| 10:40 – 12:10 | ROOM GH | Ind2 | Ind3 | Industry Session 2 Tencent Holdings Limited | |
| 10:40 – 12:10 | ROOM GH | Ind2 | Ind4 | Industry Session 2 Facebook Incorporation | |
| 10:40 – 12:10 | ROOM LB1 | Sist2 Sister Track: Planning and Search | Sist2 | Speedy versus Greedy Search (from SoCS'14) | Christopher Wilt and Wheeler Ruml |
| | | | Sist7 | Max is More than Min: Solving Maximization Problems with Heuristic Search (from SoCS'14) | Roni Stern, Scott Kiesel, Rami Puzis, Ariel Felner and Wheeler Ruml |
| | | | Sist9 | Exploiting Separability in Multiagent Planning with Continuous-State MDPs (from AAMAS'14) | Jilles Dibangoye, Christopher Amato, Olivier Buffet and François Chappillet |
| | | | Sist16 | LP-based Heuristics for Cost-optimal Planning (from ICAPS'14) | Florian Pommerening, Gabriele Roeger, Malte Helmert and Blai Bonet |
| 10:40 – 12:10 | ROOM LB2 | Main 19 Game Theory 5 | Main 214 | Equilibrium Refinement through Negotiation in Binary Voting | Umberto Grandi, Davide Grossi, Paolo Turrini |
| | | | Main 387 | Welfare Maximization in Fractional Hedonic Games | Haris Aziz, Serge Gaspers, Joachim Gudmundsson, Julián Mestre, Hanjo Täubig |
| | | | Main 1009 | A Bargaining Mechanism for One-Way Games | Andres Abeliuk, Gerardo Berbeglia, Pascal Van Hentenryck |
| | | | Main 740 | Convergence to Equilibria in Strategic Candidacy | Maria Polukarov, Svetlana Obraztsova, Zinovi Rabinovich, Alexander Krugluis, Nick Jennings |
| | | | Main 713 | A Dictatorship Theorem for Cake Cutting | Simina Brânzei, Peter Bro B. Miltersen |
| | | | Main 1068 | A Pseudo-Polynomial Algorithm for Computing Power Indices in Graph-Restricted Weighted Voting Games | Oskar Skibski, Tomasz P. Michalak, Yuko Sakurai, Makoto Yokoo |
| | | | Main 737 | Strategic Candidacy Games with Lazy Candidates | Edith Elkind, Svetlana Obraztsova, Maria Polukarov, Zinovi Rabinovich |
| | | | Main 709 | The Game-Theoretic Interaction Index on Social Networks With Applications to Link Prediction and Community Detection | Piotr Szczepański, Tomasz P. Michalak, Talal Rahwan, Aleksy Barcz |

| | | | | | |
|---------------|----------|------------------------------------------------------|-----------|-----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| 10:40 – 12:10 | ROOM LB3 | Main 20 Natural Language Processing 3 | Main 1018 | Do we criticise (and laugh) in the same way? Multi-lingual automatic detection of satirical news in Twitter | Francesco Barbieri, Horacio Saggion, Francesco Ronzano |
| | | | Main 324 | Reader-Aware Multi-Document Summarization via Sparse Coding | Piji Li, Lidong Bing, Wai Lam, Hang Li |
| | | | Main 1083 | Towards Addressing the Winograd Schema Challenge – Building and Using Needed Tools | Arpit Sharma, Somak Aditya, Nguyen H. Vo, Chitta Baral |
| | | | Main 20 | User Modeling with Neural Network for Review Rating Prediction | Duyu Tang, Bing Qin, Ting Liu |
| | | | Main 210 | A Hybrid Neural Model for Type Classification of Entity Mentions | Li Dong, Furu Wei, Hong Sun, Ming Zhou, Ke Xu |
| | | | Main 335 | Learning Term Embeddings for Hypernymy Identification | Zheng Yu, Haixun Wang, Xuermin Lin |
| | | | Main 238 | Syntax-based deep matching of short texts | wang mingxuan, Lu Zhengdong, Li Hang, Qun Liu |
| 10:40 – 12:10 | ROOM LP | KR8 KR Track: Conceptualization and causality | KR29 | Efficiently Finding Conditional Instruments for Causal Inference | Benito van der Zander, Johannes Textor, Maciej Liskiewicz |
| | | | KR219 | Query Understanding through Knowledge-Based Conceptualization | Zhongyuan Wang, Kejun Zhao, Haixun Wang, Xiaofeng Meng, Ji-Rong Wen |
| | | | KR232 | Membership Constraints in Formal Concept Analysis | Sebastian Rudolph, Christian Sacarea, Diana Troanca |
| | | | KR325 | A Modification of the Halpern–Pearl Definition of Causality | Joseph Halpern |
| | | | KR1550 | Characterizing Causal Action Theories and Their Implementations in Answer Set Programming: Action Languages B, C and Beyond | Haodi Zhang, Fangzhen Lin |
| 10:40 – 12:10 | ROOM R1 | ML9 ML Track: Partial Label Learning | ML82 | Weakly Supervised Matrix Factorization for Noisily Tagged Image Parsing | Yulei Niu, Zhiwu Lu, Ji-Rong Wen |
| | | | ML111 | A Direct Boosting Approach for Semi-supervised Classification | Shaodan Zhai, Tian Xia, Zhongliang Li, Shaojun Wang |
| | | | ML305 | Solving the Partial Label Learning Problem: An Instance-based Approach | Min-Ling Zhang, Fei Yu |
| | | | ML390 | Maximum Entropy Semi-Supervised Inverse Reinforcement Learning | Julien Audiffren, Michal Valko, Alessandro Lazaric, Mohammad Ghavamzadeh |
| | | | ML431 | Pre-release Prediction of Crowd Opinion on Movies | Xin Geng, Peng Hou |
| | | | ML580 | Constrained Information-Theoretic Tripartite Graph Clustering to Identify Semantically Similar Relations | Chenguang Wang, Yangqiu Song, Dan Roth, Chi Wang, Jiawei Han, Heng Ji, Ming Zhang |
| | | | ML660 | Extended Discriminative Random Walk: A Hypergraph Approach to Multi-View Multi-Relational Transductive Learning | Sai Nageswar Satchidanand, Harini Ananthapadmanaban, Balaraman Ravindran |
| 10:40 – 12:10 | ROOM R2 | Main 36 Multidisciplinary Topics and Applications | Main 1417 | The Right to Obscure: a Mechanism and Initial Evaluation | Eric Huang, Jaron Lanier, Yoav Shoham |
| | | | Main 1362 | Automated Geometry Theorem Proving for Human-Readable Proofs | Ke Wang, Zhendong Su |
| | | | Main 472 | Combining Eye Movements and EEG to Enhance Emotion Recognition | Yifei Lu, Wei-Long Zheng, Bin-Bin Li, Bao-Liang Lu |
| | | | Main 133 | Offline Sketch Parsing via Shapeness Estimation | Wu Jie, Changhu Wang, Liqing Zhang, Yong Rui |
| | | | Main 1404 | A New Input Method for Human Translators: Integrating Machine Translation Effectively and Imperceptibly | Guoping Huang, Jiajun Zhang, Yu Zhou, Chengqing Zong |
| | | | Main 649 | A Study of Human-Agent collaboration for Multi-UAV Coordination in Dynamic Environments | Sarvapali D Ramchurn, Joel E. Fischer, Yuki Ikuno, Feng Wu, Jack Flann, Antony Waldock |
| | | | Main 442 | Handling Complex Commands for Service Robot Task Requests | Perera Vittorio, Manuela Veloso |
| | | | Main 1123 | Algorithmic exam generation | Omer Geiger, Shaul Markovitch |

DAY 2

WEDNESDAY, JULY 29TH

| | | | | | |
|---------------|----------|------------------------------------------------------------|-----------|------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| 10:40 – 12:10 | ROOM R3 | CS4 CS Track: Reasoning, Planning and Learning | CS8 | α -min: a compact approximate solver for finite-horizon POMDPs | Yann Dujardin, Thomas Dietterich, Iadine Chades |
| | | | CS15 | Online Mechanisms for Charging Electric Vehicles in Settings with Varying Marginal Electricity Costs | Keiichiro Hayakawa, Enrico H. Gerding, Sebastian Stein, Takahiro Shiga |
| | | | CS34 | Multiple Instance Learning-based Birdsong Classification using Unsupervised Recording Segmentation | Jose F. Ruiz-Munoz, Mauricio Orozco-Alzate, G. Castellanos-Dominguez |
| | | | CS40 | Optimal Electric Vehicle Charging Station Placement | Yanhai Xiong, Jiarui Gan, Bo An, Chunyan Miao, Ana L. C. Bazzan |
| | | | CS44 | Reasoning about Connectivity Constraints | Christian Bessiere, Emmanuel Hebrard, George Katsirelos, Walsh Toby |
| | | | CS56 | Secure Routing in Wireless Sensor Networks via POMDPs | Athirai A. Irissappane, Jie Zhang, Frans Oliehoek, Partha S. Dutta |
| 12:10 – 12:30 | | Poster 6 | Poster 6 | | |
| 12:30 – 14:00 | | Lunch 2 | Lunch | | |
| 14:00 – 15:00 | ROOM LB | Invited 3 | Invited 3 | Invited Talk 3: Pete Wurman AI and Robotics: Tales from Kiva Systems | Pete Wurman |
| 14:00 – 15:00 | ROOM R | Invited 4 | Invited 4 | Invited Talk 4: Dr. Evgeniy Gabrilovich In Knowledge We Trust | Dr. Evgeniy Gabrilovich |
| 15:00 – 15:10 | | Transition 3 | | Transition | |
| 15:10 – 16:30 | ROOM GH | Ind3 | Ind5 | Industry Session 3, Baidu Incorporation | |
| 15:10 – 16:30 | ROOM GH | Ind3 | Ind6 | Industry Session 3, Google Incorporation | |
| 15:10 – 16:30 | ROOM LB1 | Main 23 Game Theory 6 | Main 936 | Envy-free Sponsored Search Auctions with Budgets | Bo Tang, Jinshan Zhang |
| | | | Main 1246 | Smooth UCT Search in Computer Poker | Johannes Heinrich, David Silver |
| | | | Main 1174 | Limited Lookahead in Incomplete-Information Games | Christian Kroer, Tuomas Sandholm |
| | | | Main 1115 | Structural Tractability of Shapley and Banzhaf Values in Allocation Games | Gianluigi Greco, Francesco Lupia, Francesco Scarcello |
| | | | Main 853 | Incentivizing Peer Grading in MOOCs: An Audit Game Approach | Alejandro Carbonara, Anupam Datta, Arunesh Sinha, Yair Zick |
| | | | Main 786 | SAT is an Effective and Complete Method for Solving Stable Matching Problems with Couples | Joanna Drummond, Perrault Andrew, Fahiem Bacchus |
| 15:10 – 16:30 | ROOM LB2 | Panel 1 Session Chair: Michael Woodridge | Panel 1 | Panel: The Future of AI | |
| 15:10 – 16:30 | ROOM LB3 | Main 24 Planning 2 | Main 320 | Classical Planning with Simulations: Results on the Atari Video Games | Nir Lipovetzky, Miquel Ramirez, Hector Geffner |
| | | | Main 1098 | Models of Action Concurrency in Temporal Planning | Jussi Rintanen |
| | | | Main 604 | Sorting Sequential Portfolios in Automated Planning | Núñez Sergio, Daniel Borrajo, Carlos Linares López |
| | | | Main 1367 | Exploiting Block Deordering for Improving Planners Efficiency | Lukas Chrpá, Fazlu Hasan Siddiqui |
| | | | Main 969 | Delete Relaxations for Planning with State-Dependent Action Costs | Florian Geißer, Thomas Keller, Robert Mattmüller |
| 15:10 – 16:30 | ROOM LP | KR7 KR Track: Epistemic logics | KR157 | Only Knowing Meets Common Knowledge | Vaishak Belle, Gerhard Lakemeyer |
| | | | KR183 | Epistemic equilibrium logic | Luis Fariñas del Cerro, Andreas Herzig, Ezgi Iraz Su |
| | | | KR190 | Verification of Knowledge-Based Programs over Description Logic Actions | Benjamin Zarriß, Jens Claßen |
| | | | KR227 | Multi-Agent Only Knowing on Planet Kripke | Guillaume Aucher, Vaishak Belle |

| | | | | | |
|---------------|----------|-----------------------------------------------------|---------------------|--------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| 15:10 – 16:30 | ROOM R1 | Main 25 Constraint Optimization | Main 112 | Finding Diverse Solutions of High Quality to Constraint Optimization Problems | Thierry Petit, Andrew C. Trapp |
| | | | Main 1141 | Improving the Effectiveness of SAT-Based Preprocessing for MaxSAT | Jeremias Berg, Paul Saikko, Matti Järvisalo |
| | | | Main 482 | Maximum Satisfiability using Cores and Correction Sets | Nikolaj Bjorner, Nina Narodytska |
| | | | Main 375 | A Multicore Tool for Constraint Solving | Amadini Roberto, Maurizio Gabbrielli, Jacopo Mauro |
| 15:10 – 16:30 | ROOM R2 | Main 26 Heuristic Search 2 | Main 638 | Compositional Program Synthesis from Natural Language and Examples | Mohammad Raza, Sumit Gulwani, Natasa Milic-Frayling |
| | | | Main 301 | ICBS: The Improved Conflict-based Search algorithm for Multi-Agent Pathfinding | Eli Boyarski, Ariel Felner, Roni Stern, Guni Sharon, Oded Betzalel, Solomon Shimony, David Tolpin |
| | | | Main 1460 | Programming by Example for Text Normalization | Dileep Kini, Sumit Gulwani |
| | | | Main 81 | A Fast Local Search for Mnimum Vertex Cover in Massive Graphs | Shaowei Cai |
| | | | Main 1464 | A Fast Goal Recognition Technique based on Interaction Estimates | Yolanda Escudero Martin, Maria Dolores Rodriguez Moreno, David E. Smith |
| 15:10 – 16:30 | ROOM R3 | ML10 ML Track: Multi-view Learning | ML55 | MUVIR: Multi-View Rare Category Detection | Zhou Dawei, Jingrui He, K. Selçuk Candan, Hasan Davulcu |
| | | | ML80 | Dual-regularized Multi-view Outlier Detection | Handong Zhao, Yun Fu |
| | | | ML512 | Multi-View Matrix Decomposition: A New Scheme for Exploring Discriminative Information | Cheng Deng, Zongting Lv, Wei Liu, Junzhou Huang, Dacheng Tao, Xinbo Gao |
| | | | ML529 | Multi-Graph-View Learning for Complicated Object Classification | Jia Wu, Shirui Pan, Xingquan Zhu, Chenqqi Zhang |
| | | | ML639 | Multi-view Self-Paced Learning for Clustering | Chang Xu, Dacheng Tao, Chao Xu |
| 16:30 – 17:00 | | Poster 7 | Coffee and Poster 7 | | |
| 17:00 – 18:00 | ROOM GH | Ind4 | Ind7 | Industry Session 4, Huawei Technologies Company Limited | |
| 17:00 – 18:00 | ROOM GH | Ind4 | Ind8 | Industry Session 4, BigML Incorporaion | |
| 17:00 – 18:00 | ROOM LB1 | Main 27 Multiagent Systems 2 | Main 1490 | Towards City-scale Mobile Crowdsourcing: Task Recommendations under Trajectory Uncertainties | Cen Chen, Shih-Fen Cheng, Archan Misra, Hoong Chuin Lau |
| | | | Main 376 | A Scalable Interdependent Multi-Issue Negotiation Protocol for Energy Exchange | Muddasser Alam, Enrico H. Gerding, Alex Rogers, Sarvapali D. Ramchurn |
| | | | Main 1259 | Spectrum-based Fault Localisation for Multi-Agent Systems | Lúcio Passos, Rui Abreu, Rosaldo J. F. Rossetti |
| 17:00 – 18:00 | ROOM LB2 | Main 28 Social Networks 2 | Main 665 | Personalized Ranking Metric Embedding for Next New POI Recommendation | Shanshan Feng, Tao Xu, Yifeng Zeng, Gao Cong, Yeow Meng Chee, Quan Yuan |
| | | | Main 1228 | Nonnegative Matrix Tri-factorization with Graph Regularization for Community Detection in Social Networks | Yulong Pei, Nilanjan Chakraborty, Katia Sycara |
| | | | Main 889 | Influence Maximization in Big Network: An Incremental Algorithm for Streaming Subgraph Influence Spread Estimation | Wei-Xue Lu, Peng Zhang, Chuan Zhou, Chunyi Liu, Li Gao |
| | | | Main 1059 | CEIL: A scalable resolution limit free approach for detecting communities in large networks | Vishnu Sankar, Balaraman Ravindran, Shivashankar S. |
| 17:00 – 18:00 | ROOM LB3 | Main 61 Constraints, Satisfiability and Search 2 | Main 1187 | Solving QBF by Clause Selection | Mikolas Janota, Joao Marques-Silva |
| | | | Main 1376 | On the empirical time complexity of random 3-SAT at the phase transition | Zongxu Mu, Holger H. Hoos |
| | | | Main 915 | Multi-Pass High-Level Presolving | Kevin Leo, Guido Tack |

DAY 2

WEDNESDAY, JULY 29TH

| | | | | | |
|---------------|---------|------------------------------------------------------------------------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| 17:00 – 18:00 | ROOM LP | KR6 KR Track: Logic Programming | KR5 | Partial Grounded Fixpoints | Bart Bogaerts, Joost Vennekens, Marc Denecker |
| | | | KR182 | First-Order Disjunctive Logic Programming vs Normal Logic Programming | Yi Zhou |
| | | | KR223 | Simplifying a Logic Program Using Its Consequences | Jianmin Ji, Hai Wan, Ziwei Huo, Zhenfeng Yuan |
| | | | KR253 | Stable Model Semantics of Abstract Dialectical Frameworks Revisited: A Logic Programming Perspective | Mario Alviano, Wolfgang Faber |
| | | | KR308 | Logic Program Termination Analysis Using Rule Sizes | Marco Calautti, Sergio Greco, Cristian Molinaro, Irina Trubitsyna |
| | | | KR69 | Epistemic Quantified Boolean Logic: Expressiveness and Completeness Results | Francesco Belardinelli, Wiebe van der Hoek |
| 17:00 – 18:00 | ROOM R1 | Main 30 Main Track: Knowledge Representation, Reasoning and Logic 1 | Main 494 | Dissecting German Grammar and Swiss Passports: Open-Domain Decomposition of Compositional Entries in Large-Scale Knowledge Repositories | Marius Pasca, Hylke Buisman |
| | | | Main 1565 | A Simple Probabilistic Extension of Modal Mu-calculus | Wanwei Liu, Lei Song, Ji Wang, Lijun Zhang |
| | | | Main 1370 | Automatic Generation of Raven's Progressive Matrices | Ke Wang, Zhendong Su |
| | | | Main 483 | The Complexity of MAP Inference in Bayesian Networks Specified Through Logical Languages | Denis Maua, Cassio P. de Campos, Fabio G. Cozman |
| | | | Main 758 | On the Graded Acceptability of Arguments | Davide Grossi, Sanjay Modgil |
| 17:00 – 18:00 | ROOM R2 | ML11 ML Track: Reinforcement Learning 2 | ML15 | Reinforcement Learning from Demonstration through Shaping | Tim Brys, Anna Harutyunyan, Halit Bener Suay, Sonia Chernova, Matthew E. Taylor, Ann Nowé |
| | | | ML159 | Potential Based Reward Shaping for Hierarchical Reinforcement Learning | Yang Gao, Francesca Toni |
| | | | ML316 | Increasingly Cautious Optimism for Practical PAC-MDP Exploration | Liangpeng Zhang, Ke Tang, Xin Yao |
| | | | ML402 | Direct Policy Iteration with Demonstrations | Jessica Chemali, Alessandro Lazaric |
| 17:00 – 18:00 | ROOM R3 | KR18 KR Track: Planning and Reasoning | KR68 | Complexity Results in Epistemic Planning | Bolander Thomas, Martin Jensen, François Schwarzentruber |
| | | | KR154 | Computation and Complexity of Preference Inference Based on Hierarchical Models | Nic Wilson, Anne-Marie George, Barry O'Sullivan |
| | | | KR191 | Efficient Semantic Features for Automated Reasoning over Large Theories | Cezary Kaliszyk, Josef Urban, Jiri Vyskocil |
| | | | KR208 | Fixed-parameter Tractable Reductions to SAT for Planning | Ronald de Haan, Martin Kronegger, Andreas Pfandler |
| 18:00 – 19:00 | | Poster 8 | Poster 8 | | |
| 20:00 – 24:00 | | Banquet | | IJCAI 2015 Banquet | |

| Timetable | Place | Session | Paper ID | Title | Author/ Authors |
|---------------|----------|-------------------------------------------|------------|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| 08:30 – 9:30 | ROOM LB | Invited 10 | Invited 10 | John McCarthy Award | Prof. Bart Selman |
| 09:30 – 9:40 | ROOM LB | Transition 5 | | Transition | |
| 09:40 – 10:40 | ROOM C | ML17 ML Track: High-Dimensional Data 2 | ML61 | Intersecting Manifolds: Detection, Segmentation and Labeling | Shay Deutsch, Gerard Medioni |
| | | | ML119 | Robust Subspace Segmentation by Simultaneously Learning Data Representations and Their Affinity Matrix | Xiaojie Guo |
| | | | ML248 | Mirror Representation for Modeling View-specific Transform in Person Re-identification | Yingcong Chen, Wei-Shi Zheng, Jianhuang Lai |
| | | | ML363 | Mixed Error Coding for Face Recognition with Mixed Occlusions | Ronghua Liang, Xiao-Xin Li |
| 09:40 – 10:40 | ROOM GH | Main 75 Planning 3 | Main 661 | Factored Upper Bounds for Multiagent Planning Problems with Non-Factored Value Functions | Frans Oliehoek, Matthijs Spaan, Stefan Witwicki |
| | | | Main 755 | Multi-Objective POMDPs with Lexicographic Reward Preferences | Kyle H Wray, Shlomo Zilberstein |
| | | | Main 1476 | ASAP-UCT: Abstraction of State-Action Pairs in UCT | Ankit Anand, Aditya Grover, Mausam, Parag Singla |
| 09:40 – 10:40 | ROOM LB1 | Main 46 Sequential Decision Making | Main 692 | Optimization of probabilistic argumentation with Markov Decision Models | Emmanuel Hadoux, Aurélie Beynier, Nicolas Maudet, Paul Weng, Anthony Hunter |
| | | | Main 209 | Solving MDPs with Skew Symmetric Bilinear Utility Functions | Hugo Gilbert, Olivier Spanjaard, Paolo Viappiani, Paul Weng |
| | | | Main 1245 | Stick-Breaking Policy Learning in DEC-POMDPs | Miao Liu, Christopher Amato, Xuejun Liao, Jonathan P. How, Lawrence Carin |
| | | | Main 671 | Non-monotone Adaptive Submodular Maximization | Alkis Gotovos, Amin Karbasi, Andreas Krause |
| 09:40 – 10:40 | ROOM LB2 | Main 53 Main Track: Machine Learning 1 | Main 569 | Biclustering gene expressions using factor graphs and the max-sum algorithm | Matteo Denitto, Manuele Bicego, Alessandro Farinelli |
| | | | Main 1627 | Correcting Covariate Shift with the Frank-Wolfe Algorithm | Junfeng Wen, Russell Greiner, Dale Schuurmans |
| | | | Main 63 | Character-based Parsing with Convolutional Neural Network | Zheng Xiaoqing, Haoyuan Peng, Yi Chen |
| | | | Main 510 | Revisiting Gaussian Process Dynamical Models | Jing Zhao, Shiliang Sun |
| | | | Main 530 | Adaptive Discriminative Reordering Model for Statistical Machine Translation Based on Structure Learning | Biao Zhang, JinSong Su, JunFeng Yao |
| | | | Main 513 | Joint Learning of Constituency and Dependency Grammars by Decomposed Cross-Lingual Induction | Wenbin Jiang, Qun Liu |
| 09:40 – 10:40 | ROOM LB3 | Main 64 Robotics and Vision 1 | Main 61 | Weakly Supervised RBM for Semantic Segmentation | Yong Li, Jing Liu, Yuhang Wang, Lu Han Qing |
| | | | Main 761 | Toward Estimating Others' Transition Models Under Occlusion for Multi-Robot IRL | Bogert Kenneth, Prashant Doshi |
| | | | Main 1040 | Logic-geometric programming: An optimization-based approach to combined task and motion planning | Marc Toussaint |
| 09:40 – 10:40 | ROOM LP | KR14 KR Track: DL and Ontologies 4 | KR72 | Lightweight Temporal Description Logics with Rigid Roles and Restricted TBoxes | Victor Gutiérrez-Basulto, Jean Christoph Jung, Thomas Schneider |
| | | | KR88 | Schema.org as a Description Logic | Andre Hernich, Carsten Lutz, Ana Ozaki, Frank Wolter |
| | | | KR89 | Ontology-Mediated Queries with Closed Predicates | Carsten Lutz, Inanc Seylan, Frank Wolter |
| | | | KR96 | Computing Horn Rewritings of Description Logics Ontologies | Mark Kaminski, Bernardo C. Cuenca Grau |

DAY 3

THURSDAY, JULY 30TH

| | | | | | |
|---------------|----------|-----------------------------------------------------|---------------------|-------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| 09:40 – 10:40 | ROOM R1 | Main 49 Recommender Systems 2 | Main 157 | Cross-Domain Collaborative Filtering with Review Text | Xin Xin, Zhirun Liu, Chin-Yew Lin, Heyan Huang, Xiaochi Wei |
| | | | Main 932 | Sparse Probabilistic Matrix Factorization by Laplace Distribution for Collaborative Filtering | Liping Jing, Peng Wang |
| | | | Main 635 | A Synthetic Approach for Recommendation: Combining Ratings, Social Relations and Reviews | Guang-Neng Hu, Xin-Yu Dai, Yunya Song, Shu-Jian Huang, Jia-Jun Chen |
| | | | Main 829 | Optimal Greedy Diversity for Recommendation | Ashkan Azin, Branislav Kveton, Shlomo Berkovsky, Zheng Wen |
| | | | Main 264 | Differentially Private Matrix Factorization | Jingyu Hua, Chang Xia, Sheng Zhong |
| 09:40 – 10:40 | ROOM R2 | Main 47 Constraints, Satisfiability and Search 3 | Main 440 | Compiling Constraint Networks into Multivalued Decomposable Decision Graphs | Frédéric Koriche, Jean-Marie J.M. Lagniez, Marquis Pierre, Samuel Thomas |
| | | | Main 1602 | Statistical Regimes and Runtime Prediction | Barry Hurley, Barry O'Sullivan |
| | | | Main 1280 | Exploiting the Structure of Unsatisfiable Cores in MaxSAT | Carlos Ansotegui, Frederic Didier, Joel Gabas |
| | | | Main 292 | ReACTR: Realtime Algorithm Configuration through Tournament Rankings | Tadhg Fitzgerald, Yuri Malitsky, Barry O'Sullivan |
| | | | Main 360 | Expressive Logical Combinators for Free | Pierre Geneves, Nabil Layaida, Alan Schmitt |
| 09:40 – 10:40 | ROOM R3 | ML18 ML Track: Ensemble Me- thods | ML144 | Instance-wise Weighted Nonnegative Matrix Factorization for Aggregating Partitions with Locally Reliable Clusters | Xiaodong Zheng, Shanfeng Zhu, Junning Gao, Hiroshi Mamitsuka |
| | | | ML403 | Robust Clustering Ensemble | Peng Zhou, Liang Du, Yi-Dong Shen |
| | | | ML428 | Optimizing Locally Linear Classifiers with Supervised Anchor Point Learning | Xue Mao, Zhouyu Fu, Ou Wu, Weiming Hu |
| | | | ML612 | Training-Time Optimization of a Budgeted Booster | Yi Huang, Brian Powers, Lev Reyzin |
| | | | ML648 | An Efficient Classifier Based on Hierarchical Mixing Linear Support Vector Machines | Di Wang, Xiaoqin Zhang, Mingyu Fan, Xiuzi Ye |
| 10:40 – 11:10 | | Poster 9 | Coffee and Poster 9 | | |
| 11:10 – 12:10 | ROOM C | ML19 ML Track: Sparsity | ML23 | A New Simplex Sparse Learning Model to Measure Data Similarity for Clustering | Jin Huang, Feiping Nie |
| | | | ML199 | Robust Dictionary Learning with Capped L1 Norm | Wenhao Jiang, Feiping Nie, Heng Huang |
| | | | ML284 | Convergence of Common Proximal Methods for L1 Regularized Least Squares | Shaozhe Tao, Daniel Boley, Shuzhong Zhang |
| | | | ML291 | Density Corrected Sparse Recovery when R.I.P. Condition is Broken | Ming Lin, Zhengzhong Lan, Alexander G. Hauptmann |
| | | | ML335 | Data Sparseness in Linear SVM | Xiang Li, Bin Gu, Charles Ling, Huaimin Wang |
| | | | ML616 | Efficient Generalized Conditional Gradient with Gradient Sliding for Composite Optimization | Cheung Yiu-ming, Jian Lou |
| 11:10 – 12:10 | ROOM GH | Main 31 Planning 4 | Main 523 | Adversarial Hierarchical-Task Network Planning for Complex Real-Time Games | Santiago Ontañón Villar, Michael Buro |
| | | | Main 1128 | Point-Based Planning for Multi-Objective POMDPs | Diederik Roijers, Shimon Whiteson, Frans Oliehoek |
| | | | Main 356 | Exploratory Digraph Navigation using A* | Fabrice Mayran de Chamisso, Laurent Soulier, Michaël Aupetit |
| | | | Main 754 | Optimal Policy Generation for Partially Satisfiable Co-Safe LTL Specifications | Bruno Lacerda, David Parker, Nick Hawes |
| 11:10 – 12:10 | ROOM LB1 | Sist4 Sister Track: Logic and Query | Sist3 | How to Define Certain Answers (from KR'13) | Leonid Libkin |
| | | | Sist8 | Description Logic Based Dynamic Systems: Modeling, Verification and Synthesis (from RR'13) | Diego Calvanese, Giuseppe de Giacomo, Marco Montali and Fabio Patrizi |
| | | | Sist11 | When Are Description Logic Knowledge Bases Indistinguishable? (from KR'14) | Elena Botoeva, Roman Kontchakov, Vladislav Ryzhikov, Frank Wolter and Michael Zakharyashev |

| | | | | | |
|---------------|----------|------------------------------------------------------------------------------------|-----------|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| 11:10 – 12:10 | ROOM LB2 | Main 51 Constraints, Satisfiability and Search 4 | Main 312 | Automatic Dominance Breaking for Constraint Optimization Problems | Christopher Mears, Maria Garcia-de-la-Banda |
| | | | Main 1113 | Combining Preference Elicitation and Search in Multiojective State-Space Graphs | Nawal Benabbou, Patrice Perny |
| | | | Main 171 | Improving the Efficiency of Dynamic Programming on Tree Decompositions via Machine Learning | Michael Abseher, Frederico Dusberger, Nysret Musliu, Stefan Woltran |
| | | | Main 1282 | On the Resiliency of Unit Propagation to Max-Resolution | Andre Abrame, Djamel Habet |
| | | | Main 1100 | On Constrained Boolean Pareto Optimization | Chao Qian, Yang Yu, Zhi-Hua Zhou |
| 11:10 – 12:10 | ROOM LB3 | Main 52 Main Track: Machine Learning 2 | Main 643 | Information Gathering in Networks via Active Exploration | Adish Singla, Eric Horvitz, Pushmeet Kohli, Ryan White, Andreas Krause |
| | | | Main 955 | Multi-Label Active Learning: Query Type Matters | Sheng-Jun Huang, Songcan Chen, Zhi-Hua Zhou |
| | | | Main 467 | Medical Synonym Extraction with Concept Space Models | Chang Wang, Liangliang Cao |
| | | | Main 712 | Greedy Structure Search for Sum-Product Networks | Aaron Dennis, Dan Ventura |
| | | | Main 656 | Active Learning from Crowds with Unsure Option | Jinhong Zhong, Ke Tang, Zhi-Hua Zhou |
| 11:10 – 12:10 | ROOM LP | KR15 KR Track: Datalog+/- | KR49 | Combining Rewriting and Incremental Materialisation Maintenance for Datalog Programs with Equality | Boris Motik, Yavor Nenov, Robert E. F. Piro, Ian Horrocks |
| | | | KR128 | Combining Existential Rules and Transitivity: Next Steps | Jean-François Baget, Meghyn Bienvenu, Marie-Laure Mugnier, Swan Rocher |
| | | | KR196 | Characterization of the Expressivity of Existential Rule Queries | Sebastian Rudolph, Michaël Thomazo |
| | | | KR204 | Combining Existential Rules with the Power of CP-Theories | Tommaso Di Noia, Thomas Lukasiewicz, Maria Vanina Martinez, Gerardo I. Simari, Oana Tifrea-Marcuska |
| 11:10 – 12:10 | ROOM R1 | Main 29 Heuristic Search 3 | Main 904 | Interplanetary Trajectory Planning with Monte Carlo Tree Search | Daniel Hennes, Dario Izzo |
| | | | Main 684 | H-Index Manipulation by Merging Articles: Models, Theory and Experiments | René van Bevern, Christian Komusiewicz, Rolf Niedermeier, Manuel Sorge, Toby Walsh |
| | | | Main 623 | Model-based Genetic Algorithms for Algorithm Configuration | Carlos Ansotegui, Yuri Malitsky, Horst Samulowitz, Meinolf Sellmann, Kevin Tierney |
| 11:10 – 12:10 | ROOM R2 | Main 54 Agent and Multi-agent Systems 1 | Main 944 | Revenue Maximization Envy-free Pricing for Homogeneous Resources | Gianpiero Monaco, Piotr Sankowski, Qiang Zhang |
| | | | Main 255 | Competitive Pricing for Cloud Computing in an Evolutionary Market | Bolei Xu, Tao Qin, Guoping Qiu, Tieyan Liu |
| | | | Main 621 | Optimal Incremental Preference Elicitation during Negotiation | Tim Baarslag, Enrico H. Gerding |
| | | | Main 1401 | Quantifying Robustness of Trust Systems Against Collusive Unfair Rating Attacks Using Information Theory | Dongxia Wang, Tim Muller, Jie Zhang, Yang Liu |
| 11:10 – 12:10 | ROOM R3 | Main 55 Main Track: Knowledge Representation, Reasoning and Logic 2 | Main 1112 | Finite Abstractions for the Verification of Epistemic Properties in Open Multi-Agent Systems | Francesco Belardinelli, Davide Grossi, Alessio Lomuscio |
| | | | Main 1500 | From Raw Sensor Data to Detailed Spatial Knowledge | Peng Zhang, Jae Hee Lee, Jochen Renz |
| | | | Main 622 | Formal Analysis of Dialogues on Infinite Argumentation Frameworks | Francesco Belardinelli, Davide Grossi, Nicolas Maudet |
| | | | Main 707 | A Common-Sense Conceptual Categorization System Integrating Proxytypes and the Dual Process of Reasoning | Antonio Lieto, Daniele Paolo Radicioni, Valentina Rho |
| 12:10 – 12:30 | | | Poster 10 | | |

DAY 3

THURSDAY, JULY 30TH

| | | | | | |
|---------------|----------|-----------------------------------------------------|-----------|-------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 12:30 – 14:00 | | Lunch 3 | | Lunch | |
| 14:00 – 15:00 | ROOM LB | Invited 5 | Invited 5 | Invited Talk 5: Jon McCormack Art is a System | Jon McCormack |
| 14:00 – 15:00 | ROOM R | Invited 6 | Invited 6 | Invited Talk 6: Manuela M. Veloso Making Intelligent Mobile Service Robots a Reality | Manuela M. Veloso |
| 15:00 – 15:10 | | Transition 4 | | Transition | |
| 15:10 – 16:30 | ROOM C | AIA3 AI&Arts: Music, Language, Visual Arts | AIA4 | Generating 1/f noise sequences as constraint satisfaction: the Voss constraint | Francois Pachet |
| | | | AIA25 | Generating all Possible Palindromes from N-gram Corpora | Alexandre Papadopoulos, Pierre Roy, Jean-Charles Régin, Francois Pachet |
| | | | AIA40 | Narrative Hermeneutic Circle: Improving Character Role Identification from Natural Language Text via Feedback Loops | Josep Valls-Vargas, Jichen Zhu, Santiago Ontanon |
| | | | AIA43 | Evolving Ambiguous Images | Adriano Vinhas, João Correia, Penousal Machado, Aniko Ekart |
| 15:10 – 16:30 | ROOM GH | Main 2 Natural Language Processing 4 | Main 51 | Modeling Mention, Context and Entity with Neural Networks for Entity Disambiguation | Yaming Sun, Duyu Tang, Lei Lin, Zhenzhou Ji, Xiaolong Wang |
| | | | Main 52 | A Subspace Learning Framework for Cross-Lingual Sentiment Classification with Partial Parallel Data | Guangyou Zhou, Jun Zhao, Xiao Miao |
| | | | Main 251 | Compressive Document Summarization via Sparse Optimization | Jin-ge Yao, Xiaojun Wan, Jianguo Xiao |
| | | | Main 744 | Embedding Semantic Relations into Word Representations | Danushka Bollegala, Takanori Maehara, Ken-ichi Kawarabayashi |
| | | | Main 203 | Word-error correction of continuous speech recognition based on Normalized Relevance Distance | Yohei Fusayasu, Katsuyuki Tanaka, Tetsuya Takiguchi, Yasuo Ariki |
| | | | Main 949 | Convolutional Neural Networks for Text Hashing | Jiaming Xu, Peng Wang, Guanhua Tian, Bo Xu, Jun Zhao, Wei Hong Hao |
| 15:10 – 16:30 | ROOM LB1 | Main 39 Main Track: Ontologies | Main 1114 | How to select one preferred assertional-based repair from inconsistent and uncertain Description Logic knowledge bases? | Salem Benferhat, Zied Bouraoui, Karim Tabia |
| | | | Main 347 | {Unsupervised Learning of an IS-A Taxonomy from a Limited Domain-Specific Corpus | Daniele Alfarone, Jesse Davis |
| | | | Main 1600 | Scalable Maintenance of Knowledge Discovery in an Ontology Stream | Freddy Lecue |
| | | | Main 464 | Coherence Across Components in Cognitive Systems – One Ontology to Rule Them All | Gregor Behnke, Denis Ponomaryov, Marvin Rüdiger Georg Schiller, Pascal Bercher, Florian Nothdurft, Birte Glimm, Susanne Biundo |
| | | | Main 1294 | Bootstrapping domain ontologies from Wikipedia: a uniform approach | Daniil Mirylenka, Andrea Passerini, Luciano Serafini |
| | | | Main 1497 | An Ontology Matching Approach Based on Affinity-Preserving RandomWalks | Xiang Chuncheng |
| 15:10 – 16:30 | ROOM LB2 | Main 9 Social Choice Theory | Main 1365 | Ranked Voting on Social Networks | Ariel D. Procaccia, Nisarg Shah, Eric Sodomka |
| | | | Main 297 | Non-Myopic Negotiators See What's Best | Yair Zick, Yoram Bachrach, Ian Kash, Peter Key |
| | | | Main 57 | Efficient, Private and epsilon-Strategyproof Elicitation of Tournament Voting Rules | Lee David |
| | | | Main 1101 | Structure in Dichotomous Preferences | Edith Elkind, Martin Lackner |
| | | | Main 1179 | Lie on the Fly: Practical Manipulation with Incomplete Information | Lihi Dery, Zinovi Rabinovich, Svetlana Obraztsova, Meir Kalech |

| | | | | | |
|---------------|----------|----------------------------------------------------------------|----------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| 15:10 – 16:30 | ROOM LB3 | Main 40 Graphical Models | Main 1035 | A Unified Model for Unsupervised Opinion Spamming Detection Incorporating Text Generality | Yinqing Xu, Bei Shi, Wentao Tian, Wai Lam |
| | | | Main 1130 | Pushing Forward Marginal MAP with Best-First Search | Radu Marinescu, Rina Dechter, Alexander Ihler |
| | | | Main 866 | From Weighted to Unweighted Model Counting | Supratik Chakraborty, Dror Fried, Kuldeep Meel, Moshe Y. Vardi |
| | | | Main 141 | Bayesian Modelling of Community-Based Multidimensional Trust in Participatory Sensing under Data Sparsity | Venanzi Matteo, Luke Teacy, Alex Rogers, Nick Jennings |
| | | | Main 337 | Differential Semantics of Intervention in Bayesian Networks | Biao Qin |
| | | | Main 215 | Indirect Causes in Dynamic Bayesian Networks Revisited | Alexander Motzek, Ralf Moeller |
| 15:10 – 16:30 | ROOM LP | KR11 KR Track: Reasoning | KR44 | MergeXplain: Fast Computation of Multiple Conflicts for Diagnosis | Kostyantyn Shchekotykhin, Dietmar Jannach, Thomas Schmitz |
| | | | KR226 | A MaxSAT Algorithm Using Cardinality Constraints of Bounded Size | Mario Alviano, Carmine Dodaro, Francesco Ricca |
| | | | KR238 | On the entailment problem for a logic of typicality | Richard Booth, Giovanni Casini, Thomas Meyer, Ivan J. Varzinczak |
| | | | KR256 | Bidirectional Constraints for Exchanging Data: Beyond Monotone Queries | Marcelo Arenas, Gabriel Diéguez, Jorge Pérez |
| | | | KR290 | Did you know?: Mining Interesting Trivia for Entities from Wikipedia | Abhay Prakash, Manoj Kumar Chinnakotla, Dhaval Patel, Puneet Garg |
| 15:10 – 16:30 | ROOM R1 | Main 41 Planning 5 | Main 927 | Synthesis for LTL and LDL on finite traces | Giuseppe de Giacomo, Moshe Y. Vardi |
| | | | Main 789 | Metareasoning for Planning Under Uncertainty | Christopher Lin, Andrey Kolobov, Ece Kamar, Eric Horvitz |
| | | | Main 1548 | On the boundary of (un)decidability: decidable model-checking for a fragment of Resource Agent Logic | Natasha Alechina, Nils Bulling, Brian Logan, Hoang Nga Nguyen |
| | | | Main 108 | Action2Activity: Recognizing Complex Activities from Sensor Data | Liu Ye, Liqiang Li Nie, Lei Han, Luming Zhang, David Rosenblum |
| | | | Main 1360 | An Iterative Approach to Synthesize Data Transformation Programs | Bo Wu, Craig A. Knoblock |
| | | | Main 211 | Estimating the Probability of Meeting a Deadline in Hierarchical Plans | Liat Cohen, Solomon Shimony, Gera Weiss |
| 15:10 – 16:30 | ROOM R2 | Main 42 Distributed Search/CSP/ Optimization | Main 38 | Collective Biobjective Optimization Algorithm for Parallel Test Paper Generation | Minh Luan Nguyen, Siu Cheung Hui, Alvis C. M. Fong |
| | | | Main 1007 | Probabilistic Inference Based Message-Passing For Resource Constrained DCOPs | Supriyo Ghosh, Akshat Kumar, Pradeep Varakantham |
| | | | Main 729 | Applying Max-sum to Asymmetric Distributed Constraint Optimization | Roie Zivan, Tomer Parash, Yarden Naveh |
| | | | Main 415 | Max-Sum Goes Private | Tamir Tassa, Roie Zivan, Tal Grinshpoun |
| 15:10 – 16:30 | ROOM R3 | ML-ISC2 ML Track: Invited Sister Conference Presentations 2 | ML-ISC5 | Employing Machine Learning to Help Verifying Research Hypotheses | Huan Liu |
| | | | ML-ISC6 | The Democratization of Optimization | Kristian Kersting |
| | | | ML-ISC7 | Tensor Methods: A New Paradigm for Training Probabilistic Models and Feature Learning | Animashree Anandkumar |
| | | | ML-ISC8 | Discrete Chebyshev Classifiers | Elad Eban |
| 16:30 – 17:00 | | Poster 11 | Coffee and Poster 11 | | |

DAY 3

THURSDAY, JULY 30TH

| | | | | | |
|---------------|----------|-----------------------------------------------------------------|------------------|-----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 17:00 – 18:00 | ROOM C | KR13 KR Track: Belief Revision 1 | KR99 | On the Parameterized Complexity of Belief Revision | Andreas Pfandler, Stefan Rümmele, Johannes Wallner, Stefan Woltran |
| | | | KR134 | An Extension-Based Approach to Belief Revision in Abstract Argumentation | Martin Diller, Adrian Haret, Thomas Linsbichler, Stefan Rümmele, Stefan Woltran |
| | | | KR146 | Characterizability in Belief Revision | Jon Yaggie, György Turán |
| | | | KR326 | On the Aggregation of Argumentation Frameworks | Jérôme Delobelle, Sébastien Konieczny, Srdjan Vesic |
| 17:00 – 18:00 | ROOM GH | CS1 CS Track: Game theory and Optimization | CS5 | Online Fair Division: analysing a Food Bank problem | Martin Aleksandrov, Haris Aziz, Serge Gaspers, Walsh Toby |
| | | | CS7 | When Security Games Go Green: Designing Defender Strategies to Prevent Poaching and Illegal Fishing | Fei Fang, Peter Stone, Milind Tambe |
| | | | CS9 | A Fast Combinatorial Algorithm for Optimizing the Spread of Cascades | Xiaojuan Wu, Dan Sheldon, Shlomo Zilberstein |
| 17:00 – 18:00 | ROOM LB1 | Main 43 Constraints, Satisfiability and Search 5 | Main 1553 | Decomposition of the Factor Encoding for CSPs | Chavalit Likitvivatanavong, Wei Xia, Roland Yap |
| | | | Main 620 | Packing Curved Objects | Ignacio Salas, Gilles Chabert |
| | | | Main 462 | Efficient Operations on MDDs for building Constraint Programming Models | Guillaume Perez, Jean-Charles Regin |
| | | | Main 1026 | Filtering Nogoods Lazily in Dynamic Symmetry Breaking During Search | Jimmy Lee, Zichen Zhu |
| 17:00 – 18:00 | ROOM LB2 | Main 44 Web and Knowledge-based Information Systems 1 | Main 1529 | Personalized Sentiment Classification Based on Latent Individuality of Microblog Users | Kaisong Song, Shi Feng, Wei Gao, Daling Wang, Ge Yu, Kam-Fai Wong |
| | | | Main 384 | Reasoning with Style | Marti Bosch, Pierre Geneves, Nabil Layaida |
| | | | Main 1413 | Short and Sparse Text Topic Modeling via Self-Aggregation | Xiaojun Quan, Chunyu Kit, Yong Ge, Sinno Jialin Pan |
| | | | Main 40 | Semantic Concept Discovery for Large-Scale Zero-Shot Event Detection | Chang Xiaojun, Yi Yang, Eric Xing, Alexander Hauptmann, Yaoliang Yu |
| 17:00 – 18:00 | ROOM LB3 | Main 45 Robotics and Vision 2 | Main 1290 | Reduced Time-Expansion Graphs for Solving Cooperative Path Finding Sub-optimally | Pavel Surynek |
| | | | Main 993 | Reactive Integrated Motion Planning and Execution | Andreas Hofmann, Enrique Fernandez-Gonzalez, Justin Helbert, Scott D. Smith, Brian C. Williams |
| | | | Main 883 | Multi-Modality Tracker Aggregation: from Generative to Discriminative | Xiaoqin Zhang, Xiuzi Ye, Wei Li |
| | | | Main 1482 | Graph-based Inverse Optimal Control for Robot Manipulation | Arunkumar Byravan, Monfort Mathew, Brian Ziebart, Byron Boots, Dieter Fox |
| 17:00 – 18:00 | ROOM LP | KR12 KR Track: Answer Set Programming | KR108 | Answer Update for Rule-based Stream Reasoning | Harald Beck, Minh Dao-Tran, Thomas Eiter |
| | | | KR173 | On Knowledge Forgetting in Answer Set Programming | Jianmin Ji, Yisong Wang |
| 17:00 – 18:00 | ROOM R1 | Main 12 Game Theory 7 | Main 547 | Security Games with Information Leakage: Modeling and Computation | Haifeng Xu, Albert Xin Jiang, Arunesh Sinha, Zinovi Rabinovich, Shaddin Dughmi, Milind Tambe |
| | | | Main 1095 | When Schwartz' Conjecture Holds | Matthias Mnich, Yash Raj Shrestha, Yongjie Yang |
| | | | Main 841 | Equilibrium Analysis of Multi-Defender Security Games | Jian Lou, Yevgeniy Vorobeychik |
| | | | Main 1249 | Approximate Nash equilibria with near optimal social welfare | Artur Czumaj, Michail Fasoulakis, Marcin Jurdzinski |

| | | | | | |
|---------------|---------|---------------------------|-----------|-------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 17:00 – 18:00 | ROOM R2 | Main 74 Web Mining 2 | Main 416 | Tracking political elections on social media: Applications and Experience | Danish Contractor, Bhupesh Chawda, Sameep Mehta, L. Venkata Subramaniam, Tanveer A. Faruque |
| | | | Main 614 | Interest Inference via Structure-Constrained Multi-Source Multi-Task Learning | Xuemeng Song, Liqiang Li Nie, Luming Zhang, Tat-Seng Chua |
| | | | Main 919 | Interactive Gender Inference with Integer Linear Programming | Shoushan Li, Jingjing Wang, Guodong Zhou |
| | | | Main 1440 | Towards Domain-Specific SR: A Case Study from Geography | Sen W Shilad, Isaac Johnson, Rebecca Harper, Huy Mai, Samuel Horlbeck Olsen, Benjamin Mathers, Laura Souza Vonessen, Matthew Wright, Hecht Brent |
| | | | Main 257 | A Clustering Algorithm for Massive Amount of Texts | Ming Liu, Bing Quan Liu, Xiang Nan Zhao, Xiao Long Wang |
| 17:00 – 18:00 | ROOM R3 | ML16 ML Track: Hashing | ML70 | Learning to Hash on Partial Multi-Modal Data | Qifan Wang, Luo Si, Bin Shen |
| | | | ML154 | Quantized Correlation Hashing for Fast Cross-modal Search | Botong Wu, Qiang Yang, Wei-Shi Zheng, Yizhou Wang, Jingdong Wang |
| | | | ML277 | Ranking Preserving Hashing for Fast Similarity Search | Qifan Wang |
| | | | ML315 | Semantic Topic Multimodal Hashing for Cross-media Retrieval | Di Wang, Xinbo Gao, Xiumei Wang, Lihuo He |
| | | | ML388 | Optimal Bayesian Hashing for Efficient Face Recognition | Qi Dai, Jianguo Li, Jun Wang, Yu-Gang Jiang, Yurong Chen |
| 18:00 – 19:00 | | | Poster 12 | Poster 12 | |

| Timetable | Place | Session | Paper ID | Title | Author/ Authors |
|---------------|----------|----------------------------------------------|-------------------|--------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| 08:30 – 10:10 | ROOM C | Jnl3 Journal Track: Multiagent & Logic | Journal 7 | The Complexity of Manipulative Attacks in Nearly Single-Peaked Electorates (Extended Abstract) | Piotr Faliszewski, Edith Hemaspaandra, Lane A. Hemaspaandra |
| | | | Journal 8 | On the Testability of BDI Agent Systems (Extended Abstract) | Michael Winikoff, Stephen Cranefield |
| | | | Journal 9 | Constitutive and Regulative Specifications of Commitment Protocols: a Decoupled Approach (Extended Abstract) | Matteo Baldoni, Cristina Baroglio, Elisa Marengo, Viviana Patti |
| | | | Journal 5 | Norms as a Basis for Governing Sociotechnical Systems: Extended Abstract | Munindar P. Singh, |
| | | | Journal 11 | kLog: A Language for Logical and Relational Learning with Kernels (Extended Abstract) | Paolo Frasconi, Fabrizio Costa, Luc de Raedt, Kurt de Grave |
| | | | Journal 12 | Data Complexity of Query Answering in Description Logics (Extended Abstract) | Diego Calvanese, Giuseppe de Giacomo, Domenico Lembo, Maurizio Lenzerini, Riccardo Rosati |
| 08:30 – 10:10 | ROOM GH | Main 17 Web Mining 3 | Main 321 | Exploiting k-Degree Locality to Improve Overlapping Community Detection | Hongyi Zhang, Michael R. Lyu, Irwin King |
| | | | Main 131 | Large Scale Homophily Analysis in Twitter using a Twixonomy | Paola Velardi |
| | | | Main 158 | Unsupervised Sentiment Analysis for Social Media Images | Yilin Wang, Suhang Wang, Jiliang Tang, Huan Liu, Baoxin Li |
| | | | Main 1593 | A Unified Probabilistic Model of User Activities and Relations on Social Networking Sites | Yu Xiaofeng, Junqing Xie |
| | | | Main 74 | Minimum Sum of Squared Similarities for Large Scale Spectral Clustering | Djallel Bouneffouf |
| | | | Main 49 | Re-Ranking Voting-Based Answers by Discarding User Behavior Biases | Xiaochi Wei, Heyan Huang, Chin-Yew Lin, Xin Xin, Xianling Mao |
| | | | Main 908 | Deep Learning for Event-Driven Stock Prediction | Xiao Ding, Yue Zhang, Ting Liu, Junwen Duan |
| 08:30 – 10:10 | ROOM LB3 | Main 33 Satisfiability | Main 426 | A Modularity-based Random SAT Instances Generator | Jesús Giráldez-Cru, Jordi Levy |
| | | | Main 107 | Tractable Classes of Binary CSPs Defined by Excluded Topological Minors | David A Cohen, Martin C. Cooper, Peter Jeavons, Stanislav Zivny |
| | | | Main 1143 | Prime Compilation of Non-Clausal Formulae | Alessandro Previti, Alexey Ignatiev, Antonio Morgado, Joao Marques-Silva |
| | | | Main 992 | Efficient Model Based Diagnosis with Maximum Satisfiability | Joao Marques-Silva, Mikolas Janota, Alexey Ignatiev, Antonio Morgado |
| | | | Main 1149 | Literal-Based MCS Extraction | Carlos Mencia, Alessandro Previti, Joao Marques-Silva |
| | | | Main 1016 | An Exact Inference Scheme for MinSAT | Chu-Min Li, Felip Manyà |
| 08:30 – 10:10 | ROOM LP | KR9 KR Track: Belief revision 2 | KR35 | Trust-Sensitive Belief Revision | Aaron Hunter, Richard Booth |
| | | | KR135 | AGM Meets Abstract Argumentation: Expansion and Revision for Dung Frameworks | Ringo Baumann, Gerhard Brewka |
| | | | KR159 | Merging in the Horn fragment | Adrian Haret, Stefan Rümmele, Stefan Woltran |
| | | | KR246 | AGM Revision of Beliefs about Action and Time | Marc Zee, Mehdi Dastani, Dragan Doder, Leendert van der Torre |
| | | | KR285 | Belief Revision and Progression of Knowledge Bases in the Epistemic Situation Calculus | Christoph Schwering, Gerhard Lakemeyer, Maurice Pagnucco |
| | | | KR1322 | Kernel Contraction and Base Dependence: A Theoretical Benchmark for Relevance | Mehrdad Oveis, James Delgrande, Fred Popowich, Francis Jeffry Pelletier |
| | | | KR1488 | Extending AGM Contraction to Arbitrary Logics | Zhiqiang Zhuang, Zhe Wang, Kewen Wang, James Delgrande |

| | | | | | |
|---------------|---------|-----------------------------------|----------------------|--------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| 08:30 – 10:10 | ROOM R1 | Main 34 AI and Social Sciences | Main 565 | Computer Science on the Move: Inferring Migration Regularities from the Web via Compressed Label Propagation | Fabian Hadji, Martin Mladenov, Christian Bauckhage, Kristian Kersting |
| | | | Main 438 | Emotions in Argumentation: an Empirical Evaluation | Mohamed Sahbi Benlamine, Maher Chaouachi, Serena Villata, Elena Cabrio, Claude Frasson, Fabien Gandon |
| | | | Main 395 | Parliamentary Voting Procedures: Agenda Control, Manipulation and Uncertainty | Robert Bredereck, Jiehua Chen, Rolf Niedermeier, Toby Walsh |
| | | | Main 1512 | A Deterministic Partition Function Approximation for Exponential Random Graph Models | Wen Pu, Jaesik Choi, Yunseong Hwang, Eyal Amir |
| | | | Main 449 | Context-Independent Claim Detection for Argumentation Mining | Marco Lippi, Paolo Torroni |
| | | | Main 1357 | Semi-Universal Portfolios with Transaction Costs | Dingjiang Huang, Yan Zhu, Bin Li, Shuigeng Zhou, Steven C. H. Hoi |
| | | | Main 1039 | Bonus or Not? Learn to Reward in Crowdsourcing | Ming Yin, Yiling Chen |
| 08:30 – 10:10 | ROOM R2 | ML12 ML Track: Deep Learning 2 | ML42 | Gaussian Processes for High-Dimensional Regression: A Method Based on Deep Neural Networks | Wenbing Huang, Deli Zhao, Fuchun Sun, Huaping Liu, Edward Chang |
| | | | ML62 | Deep Linear Coding for Fast Graph Clustering | Ming Shao, Sheng Li, Zhengming Ding, Yun Fu |
| | | | ML128 | Robust Kernel Dictionary Learning using A Whole Sequence Convergent Algorithm | Huaping Liu |
| | | | ML246 | Self-Adaptive Hierarchical Sentence Model | Han Zhao, Zhengdong Lu, Pascal Poupart |
| | | | ML313 | Supervised Representation Learning: Transfer Learning with Deep Autoencoders | Fuzhen Zhuang, Xiaohu Cheng, Ping Luo, Sinno Jialin Pan, Qing He |
| | | | ML344 | Adaptive dropout rates for learning with corrupted features | Jingwei Zhuo, Jun Zhu, Bo Zhang |
| | | | ML541 | A Joint Optimization Framework of Sparse Coding and Discriminative Clustering | Zhangyang Wang, Yingzhen Yang, Shiyu Chang, Jinyan Li, Simon Fong, Thomas Huang |
| 08:30 – 10:10 | ROOM R3 | ML13 ML Track: Kernel Methods | ML13 | A Graph Kernel based on Jensen-Shannon Representation | Bai Lu, Zhihong Zhang, Chaoyan Wang, Edwin Hancock |
| | | | ML145 | Random Feature Mapping with Signed Circulant Matrix Projection | Chang Feng, Shizhong Liao |
| | | | ML216 | Graph Invariant Kernels | Francesco Orsini, Paolo Frasconi, Luc de Raedt |
| | | | ML355 | Robust Unsupervised Multiple Kernel Learning | Peng Zhou, Liang Du, Yi-Dong Shen |
| | | | ML401 | Training-Efficient Feature Map for Shift-Invariant Kernels | Xixian Chen, Haiqin Yang, Irwin King, Michael R. Lyu |
| | | | ML500 | Nonparametric Independence Testing for Small Sample Sizes | Aaditya Ramdas, Leila Wehbe |
| | | | ML625 | Robust Multiple Kernel K-means | Liang Du, Lei Shi |
| 10:10 – 10:40 | | Poster 13 | Coffee and Poster 13 | | |

DAY 4

FRIDAY, JULY 31ST

| | | | | | |
|---------------|----------|----------------------------------------------------------|-----------|----------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| 10:40 – 12:10 | ROOM C | CS3 CS Track: Game Theory, Learning and Modeling | CS11 | Aggregate Demand–Based Real–Time Pricing Mechanism for the Smart Grid: A Game–Theoretic Analysis | Sambaran Bandyopadhyay, Ramasuri Narayanan, Ramachandra Kota, Pg Dr Mohammad Iskandarbin Pg Hj Petra, Zainul M Charbiwala |
| | | | CS13 | A Personalised Thermal Comfort Model using a Bayesian Network | Frederik Auffenberg, Sebastian Stein, Alex Rogers |
| | | | CS18 | Batch Reinforcement Learning for Smart Home Energy Management | Heider Berlink, Anna Costa |
| | | | CS36 | A Crowdfunding Model for Green Energy Investment | Ronghuo Zheng, Ying Xu, Nilanjan Chakraborty, Katia Sycara |
| | | | CS54 | Abstract Routing Models and Abstractions in the Context of Vehicle Routing | René Schönfelder, Martin Leuker |
| | | | CS84 | Approximately Stable Pricing for Coordinated Purchasing of Electricity | Andrew Perrault, Craig Boutilier |
| 10:40 – 12:10 | ROOM GH | ML14 ML Track: Recommendation | ML88 | Image Feature Learning for Cold Start Problem in Display Advertising | Kaixiang Mo, Bo Liu, Lei Xiao, Yong Li, Jie Jiang |
| | | | ML108 | Ice–Breaking: Mitigating Cold–Start Recommendation Problem by Rating Comparison | Jingwei Xu, Yuan Yao, Hanghang Tong, Xianping Tao, Jian Lu |
| | | | ML109 | A Space Alignment Method for Cold–Start TV Show Recommendations | Shiyu Chang, Jiayu Zhou, Pirooz Chubak, Junling Hu |
| | | | ML213 | Mobile Query Recommendation via Tensor Function Learning | Zhou Zhao, Ruihua Song, Xing Xie, Xiaofei He |
| | | | ML352 | Scalable Maximum Margin Matrix Factorization by Active Riemannian Subspace Search | Yan Yan, Minghui Tan, Ivor W. Tsang, Qinfeng Shi, Yi Yang |
| 10:40 – 12:10 | ROOM LB1 | Sist3 Sister Track: User Modeling | Sist5 | Examples and tutored problems: adaptive support using assistance scores (from UMAP'14) | Amir Shareghi Najari, Tanja Mitrovic and Bruce McLaren |
| | | | Sist12 | Adapting to User Preference Changes in Interactive Recommendation (from RecSys'14) | Negar Hariri, Bamshad Mobasher and Robin Burke |
| | | | Sist13 | Trust–Guided Behavior Adaptation Using Case–Based Reasoning (from ICCBR'14) | Michael Floyd, Michael Drinkwater and David Aha |
| | | | Sist14 | Matching and Grokking: Approaches to Personalized Crowdsourcing (from HCOMP'14) | Peter Organisciak, Jaime Teevan, Susan Dumais, Robert C. Miller and Adam Tauman Kalai |
| 10:40 – 12:10 | ROOM LB2 | Main 35 Web and Knowledge–based Information Systems 2 | Main 25 | Distance–Bounded Consistent Query Answering | Andreas Pfandler, Emanuel Sallinger |
| | | | Main 370 | Online Learning to Rank for Content–Based Image Retrieval | Pengcheng Wu, Steven C. H. Hoi, Peilin Zhao, Ji Wan, Gao Xingyu, Dayong Wang |
| | | | Main 847 | Raising Expectations in GDA Agents Acting in Dynamic Environments | Dustin Dannenhauer, Hector Munoz–Avila |
| | | | Main 1520 | Determining Expert Research Areas with Multi–instance Learning of Hierarchical Multi–label Classification Model | Tao Wu, Qifan Wang, Zhiwei Zhang, Luo Si |
| | | | Main 1403 | Hamming Compatible Quantization for Hashing | Zhe Wang, Ling–Yu Duan, Jie Lin, Xiaofang Wang, Tiejun Huang, Wen Gao |
| | | | Main 616 | Deep Multimodal Hashing with Orthogonal Regularization | Daixin Wang, Peng Cui, Mingdong Ou, Wenwu Zhu |
| | | | Main 1419 | Web Page Classification based on Uncorrelated Semi–supervised Intra–view and Inter–view Manifold Discriminant Feature Extraction | Qian Liu, Jing Xiao–Yuan, Wu Fei, Yangping Zhu |
| | | | Main 945 | Scalable Graph Hashing with Feature Transformation | Qing–Yuan Jiang, Wu–Jun Li |

| | | | | | |
|---------------|----------|--------------------------------------------------------|-----------|--------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| 10:40 – 12:10 | ROOM LB3 | Main 22 Planning 6 | Main 685 | Integrating Partial Order Reduction and Symmetry Elimination for Cost-Optimal Classical Planning | Martin Wehrle, Malte Helmert, Alexander Shleyfman, Michael Katz |
| | | | Main 160 | MORRF/ : Sampling-Based Multi-Objective Motion Planning | Daqing Yi, Michael A Goodrich, Kevin D. Seppi |
| | | | Main 1197 | A Privacy Preserving Algorithm for Multi-Agent Planning and Search | Brafman Ronen |
| | | | Main 1050 | Simulation-Based Admissible Dominance Pruning | Alvaro Torralba, Joerg Hoffmann |
| | | | Main 1330 | Optimal planning with axioms | Franc Ivankovic, Patrik Haslum |
| 10:40 – 12:10 | ROOM LP | KR10 KR Track: Reasoning about actions and planning | KR129 | Allegro: Belief-based Golog in Stochastic Dynamical Domains | Vaishak Belle, Hector Levesque |
| | | | KR184 | On the Progression of Knowledge and Belief for Nondeterministic Actions in the Situation Calculus | Liangda Fang, Yongmei Liu, Ximing Wen |
| | | | KR197 | Automatic Verification of Partial Correctness of Golog Programs | Naiqi Li, Yongmei Liu |
| | | | KR229 | A Complete Epistemic Planner without Epistemic Closed World Assumption | Rui Yang, Hai Wan, Liangda Fang, Yongmei Liu, Huada Xu |
| | | | KR322 | Policies that Generalize: Solving Many Planning Problems with the Same Controller | Bonet Blai, Hector Geffner |
| | | | KR323 | Towards Fully Observable Non-deterministic Planning as Assumption-based Reactive Synthesis | Nicolas D'Ippolito, Sebastian Sardina |
| | | | KR18 | On the Undecidability of the Situation Calculus Extended with Description Logic Ontologies | Diego Calvanese, Giuseppe de Giacomo, Mikhail Soutchanski |
| 10:40 – 12:10 | ROOM R1 | Panel 2 Session Chair: Qiang Yang | Panel2 | Panel: Rethinking Turning Test | |
| 10:40 – 12:10 | ROOM R2 | Main 38 Agent and Multi-agent Systems 2 | Main 67 | Generalizing the single-crossing property on lines and trees to intermediate preferences on median graphs | Adam D. Clearwater, Clemens Puppe, Arkadii Slinko |
| | | | Main 402 | Optimal mechanism design for partially rational bidders | Zihe Wang, Pingzhong Tang |
| | | | Main 1589 | The Power of Local Manipulation Strategies in Assignment Mechanisms | Timo Mennle, Sven Seuken, Michael Weiss, Basil Philipp |
| | | | Main 300 | Characterization of Scoring Rules with Distances: Application to the Clustering of Rankings | Paolo Viappiani |
| | | | Main 1316 | An Adaptive Computational Model for Personalized Persuasion | Kang Yilin, Ah-Hwee Tan |
| | | | Main 1086 | Efficiency and complexity of price competition among single-product vendors | Ioannis Caragiannis, Xenofontas Chatzigeorgiou, Panagiotis Kanellopoulos, George A. Krimpas, Nikos Protopapas, Alexandros A. Voudouris |
| | | | Main 956 | Strategic Abstention based on Preference Extensions: Positive Results and Computer-Generated Impossibilities | Florian Brandl, Felix Brandt, Christian Geist, Johannes Hofbauer |
| | | | Main 1517 | Exchange of Indivisible Objects with Asymmetry | Zhaohong Sun, Hideaki Hata, Taiki Todo, Makoto Yokoo |

DAY 4

FRIDAY, JULY 31ST

| | | | | | |
|---------------|----------|---------------------------------------------------------|-----------|------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| 10:40 – 12:10 | ROOM R3 | ML15 ML Track: Online Learning and Sequential Data 2 | ML454 | An Expectation–Maximization Algorithm to Compute a Stochastic Factorization | Andre Barreto, Rafael L. Beirigo, Joelle Pineau, Doina Precup |
| | | | ML325 | Thompson Sampling for Budgeted Multi–armed Bandit | Yingce Xia, Haifang Li, Tao Qin, Tie–Yan Liu |
| | | | ML394 | Count–Based Frequency Estimation with Bounded Memory | Marc Bellemare |
| | | | ML434 | Bi–parameter Space Partition for Cost–Sensitive SVM | Bin Gu, Victor S. Sheng |
| | | | ML559 | Fast Cross–Validation for Incremental Learning | Pooria Joulani, Andras Gyorgy, Csaba Szepesvari |
| | | | ML573 | Online Robust Low Rank Matrix Recovery | Xiaojie Guo |
| | | | ML293 | A Geometric Theory of Feature Selection and Distance–Based Measures | Kilho Shin, Adrian Pino Angulo |
| 12:10 – 12:30 | | Poster 14 | | Poster 14 | |
| 12:30 – 14:00 | | Lunch 4 | | Lunch | |
| 14:00 – 15:00 | ROOM LB | Invited 7 | Invited 7 | Invited Talk 7: Dr. Steve Chien Using Constraint–based Search to Schedule Science Campaigns for the Rosetta Orbiter | Dr. Steve Chien |
| 14:00 – 15:00 | ROOM R | Invited 8 | Invited 8 | Invited Talk 8: Michael L. Littman Programming agents via rewards | Michael L. Littman |
| 15:00 – 15:30 | | Poster 15 | | Coffee and Poster 15 | |
| 15:30 – 16:50 | ROOM C | AIA4 AI&Arts: Music, Poetry, Visual Arts | AIA17 | Aesthetic Visual Quality Evaluation of Chinese Handwritings | Rongju Sun, Zhouhui Lian, Yingmin Tang, Jianguo Xiao |
| | | | AIA37 | Artificial Intelligence in the Concertgebouw | Andreas Arzt, Harald Frostel, Thassilo Gadermaier, Martin M Gasser, Gerhard Widmer, Maarten Grachten |
| | | | AIA45 | Swarm–based Visualisation of Consumption Patterns | Catarina Maças, Penousal Machado |
| | | | AIA53 | Haiku Generator That Reads Blogs and Illustrates Them with Sounds and Images | Rafal Rzepka, Kenji Araki |
| 15:30 – 16:50 | ROOM GH | Main 32 Natural Language Processing 5 | Main 529 | Modeling Quantum Entanglements in Quantum Language Models | Mengjiao Xie, YueXian Hou, Peng Zhang, Jingfei Li, Wenjie Li, Dawei Song |
| | | | Main 1595 | On Conceptual Labeling of a Bag of Words | Xiangyan Sun, Yanghua Xiao, Haixun Wang, Wei Wang |
| | | | Main 100 | Linking Heterogeneous Input Features with Pivots for Domain Adaptation | Zhou Guangyou, Zhao Jun, Cai Li |
| | | | Main 247 | Positive, Negative or Neutral: Learning an Expanded Opinion Lexicon from Emoticon–annotated Tweets | Felipe Bravo–Marquez, Eibe Frank, Bernhard Pfahringer |
| | | | Main 842 | Incorporating Domain and Sentiment Supervision in Representation Learning for Domain Adaptation | Biao Liu, Minlie Huang |
| | | | Main 903 | Target–dependent Twitter Sentiment Classification with Rich Automatic Features | Tin Vo, Yue Zhang |
| 15:30 – 16:50 | ROOM LB1 | Main 56 Agent and Multi–agent Systems 3 | Main 1341 | Agile Planning for Real–World Disaster Response | Feng Wu, Sarvapali D. Ramchurn, Wenchao Jiang, Joel Fischer, Tom Rodden, Nick Jennings |
| | | | Main 1157 | Structural Results for Cooperative Decentralized Control Models | Jilles Dibangoye, Olivier Buffet, Olivier Simonin |
| | | | Main 1308 | Towards Applying Interactive Dynamic Influence Diagrams to Real–Time Strategy Games | Ross Conroy, Yifeng Zeng, Marc Cavazza, Yingke Chen |
| | | | Main 1213 | Composing and Verifying Commitment–Based Multiagent Protocols | Matteo Baldoni, Cristina Baroglio, Amit K. Chopra, Munindar P. Singh |
| | | | Main 1624 | Solving the Station Repacking Problem | Alexandre Fréchette, Neil Newman, Kevin Leyton–Brown |
| | | | Main 735 | Tractable inquiry in information–rich environments | Barbara Dunin–K, Plicz, Alina Strachocka |

| | | | | | |
|---------------|----------|-----------------------------------------------|-----------|---------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| 15:30 – 16:50 | ROOM LB2 | Main 57 Planning 7 | Main 1042 | Compiling Away Uncertainty in Strong Temporal Planning with Uncontrollable Durations | Andrea Micheli, Minh Do, David E. Smith |
| | | | Main 1028 | Probabilistic Knowledge-Based Programs | Lang Jérôme, Bruno Zanuttini |
| | | | Main 1082 | Further Connections between Contract-Scheduling and Ray-Searching Problems | Spyros Angelopoulos |
| | | | Main 1203 | Temporal Planning with Semantic Attachment of Non-Linear Monotonic Continuous Behaviours | Josef Bajada, Maria Fox, Derek Long |
| | | | Main 935 | Planning for Stochastic Games with Co-safe Objectives | Lei Song, Yuan Feng, Lijun Zhang |
| 15:30 – 16:50 | ROOM LB3 | Main 58 Recommender Systems 3 | Main 288 | Music Recommenders: User Evaluation Without Real Users? | Susan Crow, Ben Horsburgh, Stewart Massie |
| | | | Main 249 | Modeling Users' Dynamic Preference for Personalized Recommendation | Xin Liu |
| | | | Main 334 | AdaBPR: A Boosting Algorithm for Item Recommendation with Implicit Feedback | Yong Liu, Peilin Zhao, Aixin Sun, Chunyan Miao |
| | | | Main 458 | Building Personal Ad Recommendation Systems for Life-Time Value Optimization with Guarantees | Georgios Theodorou, Philip Thomas, Mohammad Ghavamzadeh |
| | | | Main 239 | Recommendation Algorithms for Optimizing Hit Rate, User Satisfaction and Website Revenue, User Satisfaction and Website Revenue | Xin Wang, Yunhui Guo, Congfu Xu |
| 15:30 – 16:50 | ROOM LP | KR16 KR Track: Argumentation and Reasoning | KR7 | Modelling the Persuadee in Asymmetric Argumentation Dialogues for Persuasion | Anthony Hunter |
| | | | KR85 | Dealing with Generic Contrariness in Structured Argumentation | Pietro Baroni, Massimiliano Giacomin, Beishui Liao |
| | | | KR107 | Extension Enforcement in Abstract Argumentation as an Optimization Problem | Sylvie Coste-Marquis, Sébastien Konieczny, Jean-Guy Mailly, Pierre Marquis |
| | | | KR186 | Group Decision Making via Weighted Propositional Logic: Complexity and Islands of Tractability | Gianluigi Greco, Jérôme Lang |
| | | | KR206 | Realizability of Three-Valued Semantics for Abstract Dialectical Frameworks | Joerg Puehrer |
| | | | KR211 | On the Computational Complexity of Naive-based Semantics for Abstract Dialectical Frameworks | Sarah Gaggl, Sebastian Rudolph, Hannes Strass |
| | | | KR292 | A Top-Down Compiler for Sentential Decision Diagram | Umut Oztok, Adnan Darwiche |
| 15:30 – 16:50 | ROOM R1 | Main 59 Knowledge Acquisition | Main 1220 | AskWorld: Budget-Sensitive Query Evaluation for Knowledge-on-Demand | Mehdi Samadi, Partha Pratim Talukdar, Manuela Veloso, Tom Mitchell |
| | | | Main 1601 | An approach for Improving RDF Data with Formal Concept Analysis | Mehwish Alam, Aleksey Buzmakov, Victor Codocedo, Amedeo Napoli |
| | | | Main 422 | Personalizing Product Rankings using Collaborative Filtering on Opinion-derived Topic Profiles | Claudiu C. Musat, Boi Faltings |
| | | | Main 867 | Building Hierarchies of Concepts via Crowdsourcing | Yuyin Sun, Adish Singla, Dieter Fox, Andreas Krause |
| 15:30 – 16:50 | ROOM R2 | Main 60 Main Track: Machine Learning 3 | Main 1167 | Analysis of Sampling Algorithms for Twitter | Deepan Palguna, Vikas Joshi, Venkatesan Chakaravarthy, Ravi Kothari, L. Venkata Subramaniam |
| | | | Main 1498 | Portfolio Choices with Orthogonal Bandit Learning | Weiwei Shen, Jun Wang, Yu-Gang Jiang |
| | | | Main 1223 | Detecting Emotions in Social Media: A Constrained Optimization Approach | Yichen Wang, Aditya Pal |
| | | | Main 1193 | Regression Model Fitting under Differential Privacy and Model Inversion Attack | Yue Wang, Cheng Si, Xintao Wu |
| | | | Main 181 | Using a Recursive Neural Network to Learn an Agent's Decision Model for Plan Recognition | Francis Bisson, Hugo Larochelle, Frodoald Kabanza |

DAY 4

FRIDAY, JULY 31ST

| | | | | | |
|---------------|----------|-------------------------------------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| 15:30 - 16:50 | ROOM R3 | ML20 ML Track: Graphical Models and Nonparametrics | ML79 | EntScene: Nonparametric Bayesian Temporal Segmentation of Videos aimed at Entity-driven Scene Detection | Adway Mitra, Chiranjib Bhattacharyya, Soma Biswas |
| | | | ML147 | EigenGP: Gaussian process models with adaptive eigenfunctions | Hao Peng, Yuan Qi |
| | | | ML193 | Regularizing Flat Latent Variables with Hierarchical Topic Structures | Lin Rongcheng, Huayu Li, Xiaojun Quan, Yong Ge |
| | | | ML361 | Data Compression for Learning MRF Parameters | Khaled Refaat, Adnan Darwiche |
| | | | ML451 | Quiet: Faster Belief Propagation for Images and Related Applications | Yasuhiro Fujiwara, Dennis Shasha |
| | | | ML713 | Topic Modeling with Document Relative Similarities Paper subtitle | Jianguang Du, Jing Jiang, Dandan Song, Lejian Liao |
| 16:50 - 17:00 | | Transition 6 | | Transition | |
| 17:00 - 18:00 | ROOM C | Jnl4 Journal Track: Machine Learning Applications | Journal 13 | Continuous Body and Hand Gesture Recognition for Natural Human-Computer Interaction: Extended Abstract | Yale Song, Randall Davis |
| | | | Journal 14 | Algorithm Runtime Prediction: Methods & Evaluation (Extended Abstract) | Frank Hutter, Lin Xu, Holger Hoos, Kevin Leyton-Brown |
| | | | Journal 15 | Framing Image Description as a Ranking Task: Data, Models and Evaluation Metrics (Extended Abstract) | Micah Hodosh, Peter Young, Julia Hockenmaier |
| | | | Journal 16 | Measuring and Recommending Time-Sensitive Routes from Location-Based Data | Hsun-Ping Hsieh, Cheng-Te Li, Shou-De Lin |
| 17:00 - 18:00 | ROOM GH | Main 37 Planning 8 | Main 499 | Mixed Discrete-Continuous Heuristic Generative Planning based on Flow Tubes | Enrique Fernandez-Gonzalez, Erez Karpas, Brian C. Williams |
| | | | Main 509 | Tight Bounds for HTN planning with Task Insertion | Ron Alford, Pascal Bercher, David Aha |
| | | | Main 943 | On the Effective Configuration of Planning Domain Models | Mauro Vallati, Frank Hutter, Lukas Chrpá, Thomas Leo McCluskey |
| | | | Main 1388 | Polynomial-Time Reformulations of LTL Temporally Extended Goals into Final-State Goals | Jorge Torres, Jorge A. Baier |
| | | | Main 245 | Exploiting Symmetries by Planning for a Descriptive Quotient | Mohammad Abdulaziz, Charles Gretton, Michael Norrish |
| 17:00 - 18:00 | ROOM LB1 | Main 72 Agent and Multi-agent Systems 4 | Main 828 | Uncovering Hidden Structure through Parallel Problem Decomposition for the Set Basis Problem: Application to Materials Discovery | Yexiang Xue, Stefano Ermon, Carla P Gomes, Bart Selman |
| | | | Main 1060 | An Expert-Level Card Playing Agent Based on a Variant of Perfect Information Monte Carlo Sampling | Florian Wisser |
| | | | Main 1025 | Tradeoffs between Incentive Mechanisms in Boolean Games | Vadim Levit, Zohar Komarovsky, Tal Grinshpoun, Amnon Meisels |
| | | | Main 271 | Environment-driven social force model: Lévy walk pattern in collective behavior | Danyan Lv, Zhaofeng Li, Yichuan Jiang |
| 17:00 - 18:00 | ROOM LB2 | Main 63 Main Track: Machine Learning 4 | Main 248 | Mobility Profiling for User Verification with Anonymized Location Data | Miao Lin, Hong Cao, Vincent W. Zheng, Kevin C. Chang, Shonali Krishnaswamy |
| | | | Main 1581 | On the Consistency of AUC Pairwise Optimization | Gao Wei, Zhi-Hua Zhou |
| | | | Main 1396 | Opportunities or Risks to Reduce Labor Force in Crowdsourcing Translation? Characterizing Cost v.s. Quality in Balance | Rui Yan |
| | | | Main 1002 | Cognitive Modelling for Predicting Examinee Performance | Runze Wu, Yuping Liu, Qi Liu, Enhong Chen, Yu Su, Zhigang Chen, Guoping Hu |

| | | | | | |
|---------------|----------|--------------------------------------------------------|-----------|-------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| 17:00 – 18:00 | ROOM LB3 | Main 50 Natural Language Processing 6 | Main 1233 | Active Learning for Coreference Resolution | Mrinmaya Sachan, Eduard Hovy |
| | | | Main 980 | Integrating Importance, Non-redundancy and Coherence Graph-based Extractive Summarization | Daraksha Parveen Michael Strube |
| | | | Main 894 | Optimizing Sentence Modeling and Selection for Document Summarization | Wenpeng Yin, Yulong Pei |
| | | | Main 872 | Convolutional Neural Tensor Network Architecture for Community-based Question Answering | Xipeng Qiu, Xuanjing Huang |
| 17:00 – 18:00 | ROOM LP | KR17 KR Track: Temporal and spatial reasoning | KR50 | Qualitative Reasoning about Directions in Semantic Spaces | Steven Schockaert, Jae Hee Lee |
| | | | KR81 | An algebra of granular temporal relations | Quentin Cohen-Solal, Maroua Bouzid, Alexandre Niveau |
| | | | KR114 | Efficiently Characterizing Non-Redundant Constraints in Large Real World Qualitative Spatial Networks | Michael Sioutis, Sanjiang Li, Jean-Francois Condotta |
| | | | KR287 | Execution Monitoring as Meta-Games for General Game-Playing Robots | Rajaratnam David, Michael Thielscher |
| 17:00 – 18:00 | ROOM R1 | Main 62 Robotics and Vision 3 | Main 695 | Intelligent Agent Supporting Human-Multi-Robot Team Collaboration | Rosenfeld Ariel, Noa Agmon, Oleg Maksimov, Amos Azaria, Sarit Kraus |
| | | | Main 1466 | Grounding the Meaning of Words through Vision and Interactive Gameplay | Natalie Parde, Adam Hair, Michalis Papakostas, Konstantinos Tsiakas, Maria Dagioglou, Vangelis Karkaletsis, Rodney Nielsen |
| | | | Main 861 | Co-Acquisition of Spatial Language Syntax and Semantics | Michael Spranger, Luc Steels |
| | | | Main 727 | Learning to Interpret Natural Language Commands through Human-Robot Dialog | Thomason Jesse, Shiqi Zhang, Raymond Mooney, Peter Stone |
| 17:00 – 18:00 | ROOM R2 | Main 48 Social Networks 3 | Main 1073 | Maximizing the Coverage of Information Propagation in Social Networks | Zhefeng Wang, Qi Liu, Yu Yang, Yong Ge, Enhong Chen, Biao Chang |
| | | | Main 213 | A Scalable Community Detection Algorithm for Large Graphs Using Stochastic Block Models | Chengbin Peng, Zhihua Zhang, Ka-Chun Wong, Xiangliang Zhang, David Keyes |
| | | | Main 687 | Network Representation Learning with Rich Text Information | Cheng Yang, Zhiyuan Liu, Deli Zhao, Maosong Sun, Edward Chang |
| 17:00 – 18:00 | ROOM R3 | ML21 ML Track: Relational Learning | ML166 | Soft Predicate Invention with Structured Sparsity | William Yang Wang, Kathryn Mazaitis, William W. Cohen |
| | | | ML239 | Identification of Time-Dependent Causal Model: A Gaussian Process Treatment | Biwei Huang, Kun Zhang, Bernhard Schölkopf |
| | | | ML275 | Learning Regular Languages via Alternating Automata | Dana Angluin, Sarah Eisenstat, Dana Fisman |
| | | | ML466 | Online Learning of k-CNF Boolean Functions | Joel Veness, Marcus Hutter, Laurent Orseau, Marc Bellemare |
| | | | ML692 | Learning efficient logical robot strategies involving composable objects | Stephen Muggleton, Andrew Cropper |
| 18:00 – 18:30 | | Poster 16 | | Poster 16 | |
| 18:30 – 20:00 | ROOM LB | ClosingEvent | | Closing Event | |

Main conference venue

The IJCAI-15 will be held at the Sheraton Convention Center (SCC) which is located close to the financial district, the main commercial attractions and important cultural and entertainment centers. It is 30 kilometers from Ministro Pistarini International Airport, Ezeiza, and 7 kilometers from Jorge Newbery Domestic Airport.

The Sheraton Convention Center offers the largest event facilities in the city. Their fifteen meeting rooms totaling 6,500 square meters can accommodate up to 9,000 guests. Their venues are ideal for conferences, exhibitions, and small events. Venues include audiovisual equipment, videoconferencing services, and simultaneous translation. Plus, their specially trained staff provides excellent food and beverage service.

Convenient Transportation

Sheraton Hotel is on San Martín street near of 9 Julio Avenue and Libertador Avenue, one of the principal thoroughfares in Buenos Aires. It is 34 kilometers from Ezeiza International Airport (EZE) and 6.5 kilometers from Jorge Newbery International Airport (AEP). On Wednesday there will be bus service from here to the Banquet location. In order to get the bus, you must show your ticket.

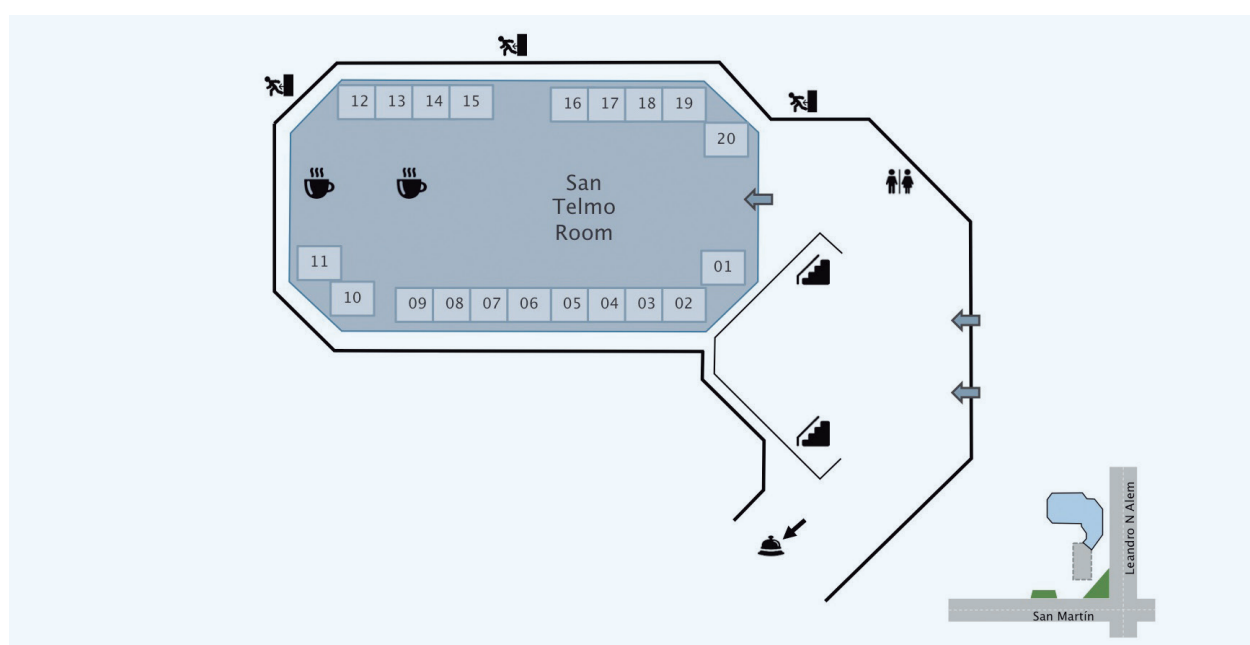

School of Law is on Figueroa Alcorta Avenue a major

thoroughfare, with a length of over 7 km along the city's northside. It is 2.5 kilometers from Sheraton Hotel.

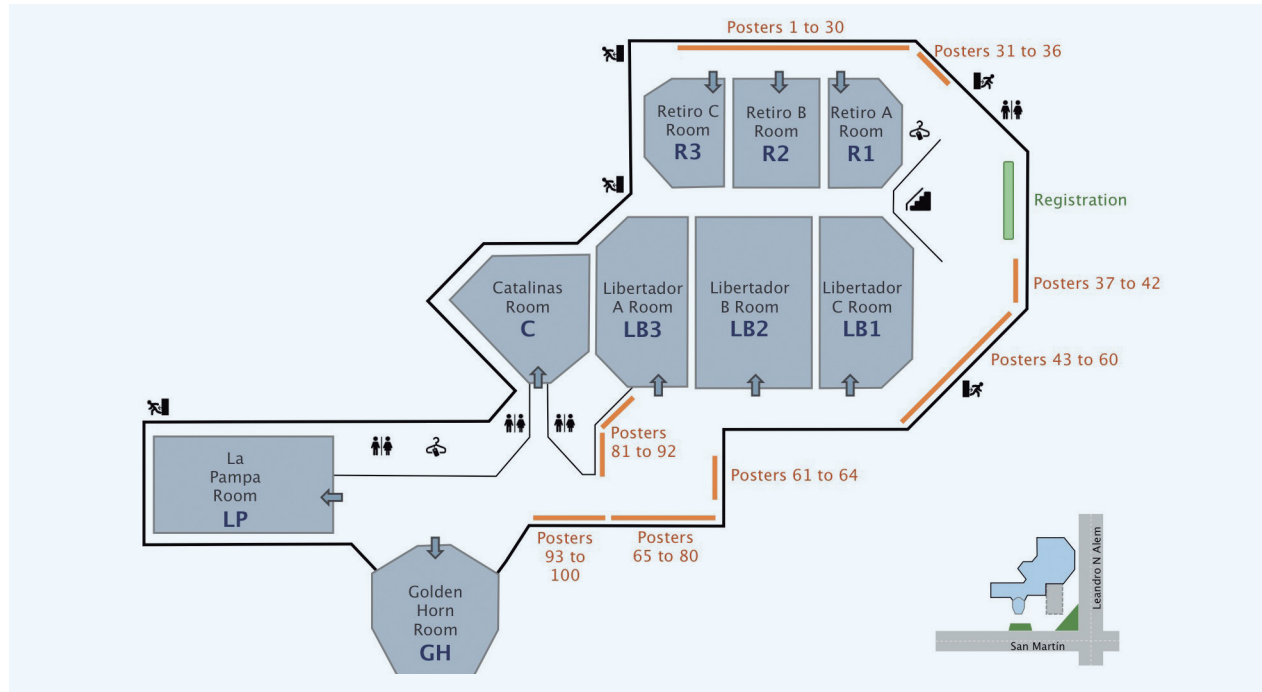

School of Economics is on Córdoba Avenue and is 3 kilometers from Sheraton Hotel. On Monday there will be bus service between here and School of Law in order to attend to the Opening Ceremony.

Sheraton - Lobby Level Exhibition Room

Sheraton - 1st Floor Room Map & Poster Distribution

Sheraton - 2nd Floor

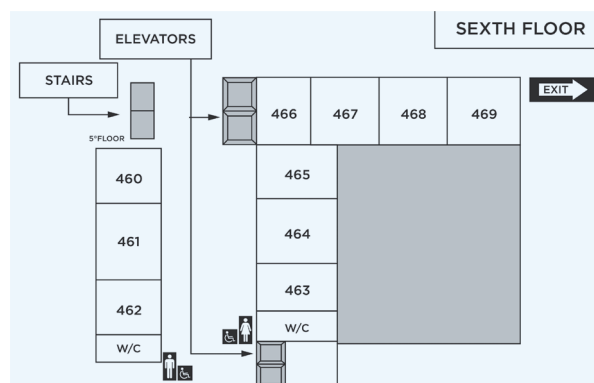

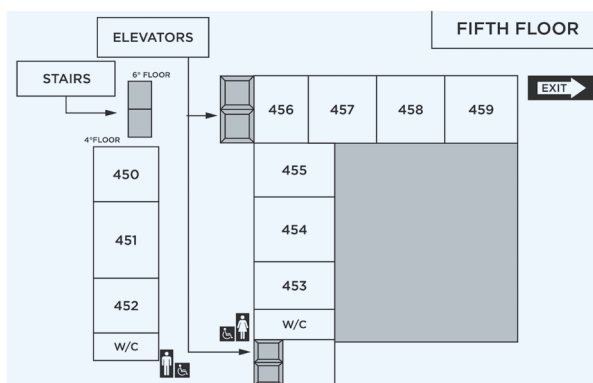

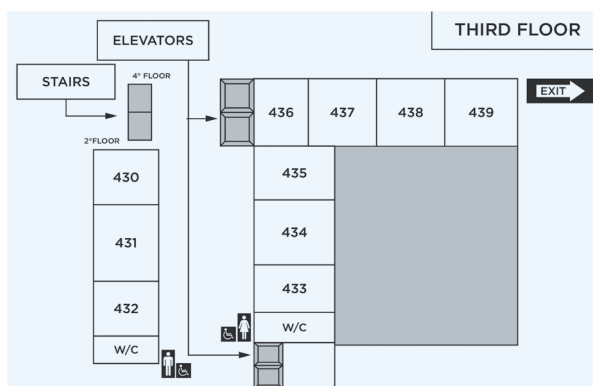

Workshops and tutorials venue

New Building of Facultad de Ciencias Económicas.
Uriburu Pres. José Evaristo Uriburu 781.

How to get Teaching Building

There are many of bus services that take you to the School. There are two Subway stations near the building: “Facultad de Medicina” of “D” Line and “Pasteur” of “B” Line. You can visit <http://mapa.buenosaires.gob.ar> in order to see all the options.

Entrance for attendees is around the corner from main building, at Uriburu Street.

IJCAI 2015 Opening & reception

July 27
19:00-21:30
School of Law
Figuerola Alcorta Avenue 2263

IJCAI 2015 Banquet

July 29
20:30-24:00
Señor Tango

How to get to

Opening ceremony

– On July 27, buses will depart from Sheraton Hotel and Convention Center and from School of Economics to School of Law starting at 18:00.
> Please, don't forget your badge.

Banquet

– On July 29, buses will depart from Sheraton Hotel and Convention Center to the Banquet location starting at 19:30.
> To get on the bus, please don't forget your banquet ticket.

Students Reception

– It will be hold in Tazz Soho, Armenia 1744, Palermo. The fastest way to arrive is Subway D Line. The nearest station is “Plaza Italia”. Please enter to <http://mapa.buenosaires.gob.ar> to see the walk path and to search for other options.
> Please don't forget your Student Reception ticket.

Restaurants

There are many restaurants near the Sheraton Hotel and the School of Economics. In the bag provided at IJCAI registration there will be some suggestions near of each place. You could ask the volunteers too.

Terms and conditions disclaimer

(To be accepted at registration time)

Registration and Payment

- Registration must be processed throughout the Online Registration System.
- All payments must be made in USD(\$)
- All payments must be done by credit card or wire transfer.

Bank Details

- Name on Receiving Bank Account: IJCAI
- Receiving Bank Routing Number (SWIFT code): DEUT-DE6FXXX
- IBAN Code: DE69 6807 0030 0140 0209 00
- Bank: Deutsche Bank
- Bank Address: DEUTSCHE BANK AG, Global Transaction Banking, Theodor-Heuss-Str. 3 D-70174 Stuttgart, Germany
- Payment reference: IJCAI-15 + Name of registered person + Paper_ID

Confirmation

- Once you submit your registration online, you will receive an email reply to confirm the registration, but your registration will still be in pending status until the payments have arrived. The registration status can be checked by clicking on the “Check Registration” button.
- Invoicing details must be indicated during the online registration process.
- Official receipt will be included in your conference package when you check in during the conference.
- E-invoices must be requested by e-mail to the Registration Services: registration@ijcai15.org
- Cancellation and Changes
- All cancellation must be sent to Registration Services by e-mail.
- Any change of name will be dealt with as a cancellation and a new registration.
- In case of cancellations until July 20, 2015, deposits will be refunded less 50 USD for administrative costs.
- No refund will be made for cancellations received after July 20, 2015 or registrants who fail to attend.

Disclaimer

In case of conference cancellation for reasons beyond the control of IJCAI-15 organizers, the liability of the IJCAI-15 organizers is limited to the fees already paid by the registrants. IJCAI-15 organizers will not be responsible for any personal inconvenience that may arise.

General Disclaimer for Hotels and other service providers:

In offering the Sheraton and various other accommodations possibilities, Buenos Aires Airport, Buenos Aires Public Transportation and all other service providers (hereinafter referred to as “Supplier(s)”) for the IJCAI-15, the IJCAI-15 organizers act only in the capacity of agent for the Suppliers and have no control over personnel, equipment or operations or providers of accommodations or other services included as part of the IJCAI-15 program. The IJCAI-15 organizers assume no responsibility for and will not be liable for any personal delay, inconvenience or other damage suffered by conference participants which may arise by reason of (1) any wrongful or negligent acts or omissions on the part of any Supplier or its employees, (2) any defect in or failure of any vehicle, equipment or instrumentality owned, operated or otherwise used by any Supplier, or (3) any wrongful or negligent acts or omissions on the part of any other party not under control, direct or otherwise, of the IJCAI-15 Organizers.

Photograph and video recording release:

For valuable consideration received, I hereby give the International joint conferences on Artificial Intelligence Organization the absolute and irrevocable right and permission, with respect to the photographs and video that will be taken of me during the IJCAI-15 held July 25-31, 2015 at the Sheraton Hotel and the Convention Center, in Buenos Aires, Argentina.

(1) To copyright the same in its own name or any other name that it may choose. (2) To use, re-use, publish, and re-publish the same in whole or in part, individually or in conjunction with other photographs or images or video recordings, in any medium and for any purpose whatsoever, including (but not by way of limitation) illustration, promotion, advertising and trade, and (3) To use my name in connection therewith if he/she so chooses.

I hereby release and discharge the Photographer/Camera-man, his/her heirs, executors, assigns and any designee (including any agency, client, broadcaster, periodical or other publication) from any and all claims and demands arising out of or in connection with the use of such photographs, film, or tape, including but not limited to any claims for defamation or invasion or privacy.

I am of legal age and have read the foregoing and fully understand the contents thereof.

Special meetings

Sunday, July 26

– IJCAI Trustees Meeting
08:30 - 18:30
Sheraton Hotel
ROOM PONCHO

Monday, July 27

– IJCAI Trustees Meeting
08:30 - 12:30
Sheraton Hotel
ROOM PONCHO

– IJCAI Executive Committee Meeting
13:30 - 18:30
Sheraton Hotel
ROOM OMBU

Tuesday, July 28

– AI Journal EB Lunch
12:30 - 14:00
Sheraton Hotel
ROOM OMBU

– International AI Societies Meeting
15:00 - 16:00
Sheraton Hotel
ROOM OMBU

– ECCAI General Assembly
16:00 - 18:00
Sheraton Hotel
ROOM OMBU

Wednesday, July 29

– Angry Birds Competition
All day. 9:00-18:00
Sheraton Hotel
ROOM OMBU

– JAIR EB Lunch
12:30 - 14:00
Sheraton Hotel
ROOM TBA

Thursday, July 30

– Angry Birds Competition
All day
Sheraton Hotel
ROOM OMBU

– ECCAI Fellows Lunch
12:30 - 14:00
Sheraton Hotel
ROOM TBA

– IJCAI Town Hall meeting
18:00 – 19:00
Sheraton Hotel
ROOM GH

Friday, July 31

– IJCAI-15 Wrap-up Meeting
09:30 – 10:30
Sheraton Hotel
ROOM PONCHO

– IJCAI-15 & IJCAI-16 Handover Meeting
10:30 – 11:30
Sheraton Hotel
ROOM PONCHO

– IJCAI Trustees Meeting
12:30 – 14:00
Sheraton Hotel

IJCAI 2015 T-Shirts

IJCAI-15 T-shirts are available for sale at the registration desk.

IJCAI 2016

IJCAI-16 will be held in New York City, July 9-15, 2015.

New York City is, of course, one of the world's great cities. It has also become a major center for AI research. Academic AI research teams in the city include Columbia, New York University, City University, and others; Rutgers, Princeton, Yale, and SUNY Stony Brook are not far away. Industrial AI labs here include branches of the Facebook, Google, and IBM, together with many other companies, large and established or up and coming.

The conference will be held at the Hilton Hotel, in the center of midtown Manhattan. The conference reception will be held half a block away at The Museum of Modern Art, perhaps the greatest collection of 20th century art anywhere. The AI fresco banquet will be in beautiful Central Park at the wonderful Central Park Zoo, a ten-minute walk away. Also within a ten minute walk of the hotel are Carnegie Hall, the Broadway theater district, Times Square, the Chrysler building, the New York Public Library, and shopping and restaurants galore. A further 20 minutes walk --- New York is a wonderful city for walking! --- in one direction or another, will get you to the Empire State Building, Lincoln Center for the Performing Arts, the Museum of Natural History, the Metropolitan Museum, the Frick Museum, and Madison Square Garden. And to list everything you could reach in a short subway ride would require a brochure much thicker than this one.

Come to IJCAI-16, and experience New York City's infinite richness and variety!
